## ACKNOWLEDGMENTS

This technical documentation was prepared within the Data Access and Use Staff, under the direction of James P. Curry, Chief, and Barbara J. Aldrich, Chief of its Technical Information Section. Annette Ralston was coordinator for this documentation. Arnold Goldstein prepared the section on sample design estimates and reliability of the data based on materials developed by the Statistical Methods Division. James Clark provided technical assistance on the data dictionary. The data dictionary was developed from materials prepared by Demographic Surveys Division staff. The alphabetic index to the data dictionary was prepared by Paul T. Zeisset. Word processing support was provided by Joann M. Sutton, Jill S. Worthington, and Peggy Taber.

**GENERAL INFORMATION**

## INTRODUCTION

### Survey Content

There are three basic elements contained in the overall design of the survey content. The first is a control card that serves several important functions. The control card is used to record basic social and demographic characteristics for each person in the household at the time of the initial interview. Because households are interviewed a total of eight or nine times, the card is also used to record changes in characteristics such as age, educational attainment, and marital status, and to record the dates when persons enter or leave the household. Finally, during each interview, information on each source of income received and the name of each job or business is transcribed to the card so that this information can be used in the updating process in subsequent interviews. A facsimile of the control card appears in an appendix to the technical documentation of SIPP files.

The second major element of the survey content is the core portion of the questionnaire. The core questions are repeated at each interview and cover labor force activity, the types and amounts of income received during the 4-month reference period, and participation status in various programs. Some of the important elements of labor force activity are recorded separately for each week of the period. Income reciprocity and amounts are recorded on a monthly basis with the exception of amounts of property income (interest, dividends, rent, etc.) which are recorded as totals for the 4-month period. The core also contains questions covering attendance in postsecondary schools, private health insurance coverage, public or subsidized rental housing, low-income energy assistance, and school breakfast and lunch participation. A facsimile of the questionnaire appears as an appendix in the technical documentation.

The third major element is the various supplements or topical modules that will be asked during selected household visits. The topical modules cover areas that need not be examined every 4 months. Certain of these topical modules are considered to be so important that they are viewed as an integral part of the overall survey. Other topical modules have more specific and more limited purposes. No topical modules were included in the first or second waves of SIPP. (See the following section on sample design for a definition of the term "wave.") The third wave topical module covers (1) educational attainment, (2) work history, and (3) health characteristics (including disability). The fourth wave topical module covers (1) assets and liabilities, (2) pension plan coverage, and (3) housing characteristics.

### Sample Design

The SIPP sample design for the 1984 panel consists of about 26,000 housing units selected to represent the noninstitutional population of the United States of which about 21,000 of these were occupied and eligible for interview. The chart on the following page shows the sample design for the first panel of SIPP. The sample households within a given panel are divided into four subsamples of nearly equal size. These subsamples are called rotation groups and one rotation group is interviewed each month. Each household in the sample was scheduled to be interviewed at 4-month intervals over a period of 2 1/2 years beginning in October 1983. The reference period for the questions is the 4-month period preceding the interview. For example, households interviewed in October 1983 were asked questions for the months June, July, August, and September. This household was interviewed again in February 1984 for the October through January period.

## Design of First SIPP Panel

| 4               | 9           | May 86                     | Jan., Feb., March, April (86)     |
| 1               | 9           | June 86                    | Feb., March, April, May (86)      |
| 2               | 9           | July 86                    | March, April, May, June (86)      |
| 3               | 9           | Aug. 86                    | April, May, June, July (86)       |

In general, one cycle of interviews covering the entire sample, using the same questionnaire, is called a wave.<sup>1</sup> This design was chosen because it provides a smooth and steady work load for data collection and processing.

A new panel of slightly smaller size is scheduled to be introduced in February 1985 and in January of each succeeding year. This overlapping design provides a much larger sample size (almost twice as large) from which cross-sectional estimates can be made. The overlap also enhances the survey's ability to measure change by lowering the standard errors on differences between estimates for two points in time.

### Survey Operations

Data collection operations are managed through the Census Bureau's 12 permanent regional offices. A staff of interviewers assigned to SIPP conduct interviews by personal visit each month with most interviewing completed during the first 2 weeks of that month. Completed questionnaires are transmitted to the regional offices where they undergo an extensive clerical edit before being entered into the Bureau's SIPP data processing system. Upon entering this processing system the data are subjected to a detailed computer edit. Errors identified in this phase are corrected and computer processing continues.

Two of the major steps of computer processing are the assignment of weights to each sample person and imputation for missing survey responses. The weighting procedures assure that SIPP estimates of the number of persons agree with independent estimates of the population within specified age, race, and sex categories. The procedures also assure close correspondence with monthly CPS estimates of households. In almost all cases, a survey nonresponse is assigned a value in the imputation phase of processing. The imputation for missing responses is based on procedures generally referred to as the "hot deck" approach. This approach assigns values for the nonresponse from a sample person who did provide a response and who has characteristics similar to those of the nonrespondent.

The longitudinal design of SIPP dictates that all persons 15 years old and over present as household members at the time of the first interview be part of the survey throughout the entire 2 1/2 year-period. To meet this goal the survey collects information useful in locating persons who move. In addition, field procedures were established that allow for the transfer of sample cases between regional offices. Persons moving within a 100-mile radius of an original sampling area (a county or group of counties) are followed and continue with the normal personal interviews at 4-month intervals. Those moving to a new residence that fall outside the 100-mile radius of any SIPP sampling area are interviewed by telephone. The geographic areas defined by these rules contain more than 95 percent of the U.S. population. Persons moving to Alaska, outside the United States, or into an institution or military barracks are not interviewed.

---

<sup>1</sup>As indicated in the chart on the previous page, wave 2 comprised only three rotation groups (three-fourths of the full sample). This exception was made in order to have the wave 6 topical module (covering taxes and other previous calendar year information) fall in the months of May, June, July, and August.

Because most types of analysis using SIPP data will be dependent not on data for individuals but on groups of individuals (households, families, etc.), provisions were made to interview all "new" persons living with original sample persons (those interviewed in the first wave). These new sample persons entering the survey through contact with original sample persons are considered as part of the sample only while residing with the original sample person.

## PLANNED PRODUCTS FROM SIPP

Data from SIPP will be used to examine differences among groups at a given point in time (cross-sectional analysis) and differences over time in the status of given persons and households (longitudinal analysis). Examples of SIPP products planned or under consideration are discussed below. Check the Monthly Product Announcement (MPA), CENDATA, or Data User News for announcements and articles relating to these products. The MPA (free of charge) may be ordered from Customer Services and Data User News (\$21 annual subscription rate) may be ordered from the U.S. Government Printing Office using the order forms on page 4-5. CENDATA is online information available through information services vendors. For further information, contact Data User Services Division on (301) 763-4100.

**Monthly average reports.** The current report, Economic Characteristics of Households in the United States: 3rd Quarter, 1983 (P-70, No. 1), showing average monthly labor force, income, and program participation statistics is an example of this type of report and is the first in a quarterly series. It is also possible to prepare monthly average estimates for longer time periods, and a publication is planned which will show monthly averages for calendar year 1984.

**Monthly transition reports.** Because information on many characteristics is collected for individual months, it is possible to tabulate data on month-to-month changes in labor force status, program participation status, and other statuses of interest. Monthly transition reports would present average monthly data for given reference periods (e.g., the average monthly rate of new labor force participants for the fourth quarter of 1983).

**Calendar-year profile reports.** These reports will provide data on the economic activity of persons and households over the course of a calendar year. Examples of the types of data that would be contained in these reports include annual earnings of persons, annual income of families and households, poverty status of persons and families, work experience during the calendar year, and compositional changes in families and households during the year.

**Topical reports.** The Census Bureau expects to produce periodic or single-time reports on particular topics (e.g. disability and earnings, health insurance coverage, household net worth). The source of the data for these reports may be either the core or topical modules or some combination of the two.

**Characteristics of persons over 1 and 2 year span.** By matching together consecutive interviews, it will be possible to obtain a month-by-month history of persons over periods of a year or longer. The reports in this series will provide information on changes in living arrangements, labor force participation, income, and program participation during 1-year or 2-year periods.

**Characteristics of families and households over 1 and 2 year span.** Reports in this series will be similar in concept to the person reports described above. A complicating factor is the compositional change that will occur in families and households over time.

**Special analytical reports.** These reports will focus on special topics and be based on a file constructed by matching consecutive interviews. The reports are likely to contain an analysis of the time period preceding and/or following a particular event such as a job change, a change in employment status, a marital disruption, or a move to a new address.

**Public-use data files.** Initially, files containing data collected in a full wave will be available. These files will be available for purchase by the public shortly after the quarterly reports are released. In addition to the modified hierarchical Wave 1 file, a rectangular file will be available in late December 1984. Other data files that will be made available for public use include calendar year longitudinal files showing monthly data for the 12-month period, panel longitudinal files showing monthly data for the entire life of the panel, and topical module files containing core and topical module data covering the 4-month reference period for a specified wave.

## SAMPLE DESIGN, ESTIMATES, AND RELIABILITY OF THE DATA

This section deals with design of the survey sample, weighting of responses, use of numerical factors to compensate for less than a full sample in making estimates, calculation of standard errors, and use of imputation flags.

### Sample Design

The SIPP survey is based on a multi-stage stratified sample of the noninstitutional resident population of the United States. More specifically, the universe of the survey includes persons living in households, plus those persons living in group quarters such as college dormitories and rooming houses. In Wave 1 of the 1984 Panel, inmates of institutions, such as homes for the aged, and persons living abroad were not in the survey universe and thus not eligible for interview. Persons residing in military barracks, although part of the noninstitutional population, were also excluded from the survey universe in Wave 1. Other people in the Armed Forces were eligible, as long as they were living in a housing unit, whether off base or on.

For Wave 2 and subsequent waves, institutionalized persons, persons living abroad, and those living in military barracks become eligible for the survey only if they move into housing units in the United States with original sample persons, i.e., those who were interviewed in Wave 1.

### Selection of Primary Sampling Units

To reduce sample selection and interviewing costs the Census Bureau first selects certain areas to be included in the sample, and then samples households within the selected areas. The first stage of this design involves the selection of these areas. The first step of this procedure is the definition of the United States in terms of counties or groups of counties called primary sampling units or PSU's.

PSU's with similar key socioeconomic characteristics are grouped together into strata. Then one sample PSU is selected from each stratum. The PSU's used for SIPP are a subsample of the sample PSU's used in the Current Population Survey.

Of the 174 strata into which PSU's were classified for the 1984 panel, 45 consisted of only a large single metropolitan area; these 45 areas were selected into the sample with certainty. These 45 PSU's are termed "self-representing." The remaining 129 strata consisted of 2 or more PSU's, from which only one was selected into the sample. These PSU's are termed "non-self-representing" because they were selected to represent other PSU's in their stratum as well as themselves.

The strata from which non-self-representing PSU's are selected typically cross State lines. For example, aside from the Detroit metro area, which represents itself, sampled PSU's in Michigan represent a geographically diverse area -- areas spread over the Midwestern States. (Thus, a tabulation of data coded to Michigan, for example, will not yield reasonable estimates for that State. Rather, State codes on the microdata files are primarily useful for determining applicable criteria for programs which vary from State to State.)

#### Selection of Ultimate Sampling Units

To arrive at the sample of households, geographic units called enumeration districts (ED's), with an average 350 housing units, are sampled from within each of these SIPP sample PSU's. Within those selected ED's 2 to 4 living quarters, or ultimate sampling units (USU's), are systematically selected from address lists prepared for the 1970 census. If the address lists are incomplete, small land areas are sampled. To account for living quarters built within each of the sample areas after the 1970 census, a sample is drawn of permits issued for construction of residential living quarters through March 1983. In jurisdictions that do not issue building permits, small land areas are sampled and the living quarters within are listed by field personnel and then subsampled. In addition, sample living quarters are selected from supplemental frames that include mobile home parks and new construction for which permits were issued prior to January 1, 1970, but for which construction was not completed until after April 1, 1970.

#### Sampling Rate and Weights

The objective of the sampling is to obtain a self-weighting probability sample. In a self-weighting sample, every sample unit has the same overall probability of selection. In self-representing PSU's the sampling rate is about 1 in 3,700. In non-self-representing PSU's, the sampling rate is higher, as the sampling is adjusted to account for the PSU's probability of selection. For example, if a non-self-representing PSU was selected with a probability of 1/10, the sampling rate within the PSU would be roughly 1 in 370 instead of 1 in 3,700.

In Wave 1, occupants of about 1,000 eligible living quarters were not interviewed because they refused to be interviewed, could not be found at home, were temporarily absent, or were otherwise unavailable. These households were not interviewed in Wave 2, and were classified as noninterviews because they were eligible for inclusion. Wave 2 included only 3 of the 4 rotation groups. For these reasons and as a result of following movers, a total of 14,532 living quarters were designated for Wave 2. Of these, 833 were not interviewed because they no longer contained eligible respondents. An additional 729 households were not interviewed in Wave 2 because of geographical remoteness or because of the reasons listed above for Wave 1 noninterviews. The noninterview rate for Wave 1 was 5 percent, and the combined noninterview rate for Wave 1 and Wave 2 was 9.4 percent.

The estimation procedure used to derive SIPP person weights involves several stages of weight adjustments. In the first wave, each person received a base weight equal to the inverse of his/her probability of selection. In the second wave, each person received a base weight that accounted for differences in the probability of selection caused by the following of movers.

A noninterview adjustment factor was applied to the weight of each interviewed person to account for persons in occupied living quarters who were eligible for the sample but were not interviewed. A factor was applied to each interviewed person's weight to account for the SIPP sample areas not having the same population distribution as the strata from which they were selected.

An additional stage of adjustment to persons' weights was performed to bring the sample estimates into agreement with independent monthly estimates of the civilian (and some military) noninstitutional population of the United States by age, race, and sex. These independent estimates were based on statistics on births, deaths, immigration, and emigration; and statistics on the strength of the Armed Forces. To increase accuracy, weights were further adjusted in such a manner that SIPP sample estimates would closely agree with Current Population Survey (CPS) estimates by type of householder (married, single with relatives or single without relatives by sex and race) and relationship to householder (spouse or other). The estimation procedure for the data in the report also involved an adjustment so that the husband and wife of a household received the same weight.

The weight estimation procedure described above resulted in persons' weights varying from about 500 to 50,000. Persons in the sample for less than the entire 4-month period received zero weights for months not in the sample. Starting in Wave 5 the weighting system will also be adjusted to account for a reduction in the number of sample units interviewed. Most statistical software packages handle weighted data with no difficulty. In tabulating a characteristic the software takes each response and applies the person weight.

Figure 1 illustrates a simple example, in which 3 of 5 persons work full-time, 2 do not. But since the persons who do not work full-time happen to have higher weights than the others, weighted totals show the two groups to be equal.

FIGURE 1. Example of Weighted Data

|          | <u>Worked</u>    |               | <u>Raw</u> |            | <u>Weighted</u> |            |
|----------|------------------|---------------|------------|------------|-----------------|------------|
|          | <u>Full-Time</u> | <u>Weight</u> | <u>No</u>  | <u>Yes</u> | <u>No</u>       | <u>Yes</u> |
| Person 1 | No               | 4,000         | 1          |            | 4,000           |            |
| Person 2 | No               | 5,000         | 1          |            | 5,000           |            |
| Person 3 | Yes              | 3,000         |            | 1          |                 | 3,000      |
| Person 4 | Yes              | 3,000         |            | 1          |                 | 3,000      |
| Person 5 | Yes              | 3,000         |            | 1          |                 | 3,000      |
|          |                  |               | 2          | 3          | 9,000           | 9,000      |

### Preparing National Estimates for Persons, Families, and Households

Weights for persons are carried on each person record, on both the relational (hierarchical) and rectangular files. Weights for households and families are carried, respectively, on the household and family records of the relational file. The weighting process defines the weight of the household to be the same as the weight of the household reference person or householder, and the weight of a family or subfamily is that of the family or subfamily reference person.

On the rectangular file, where household, family, and subfamily segments appear on each person record, all of the applicable weights can be found in that record. Tallying household characteristics from every record would result in counting multi-person households more than once. One way to avoid estimating more households than there really are is to tally household characteristics using only the householder's record, since there is always one and only one householder per household. Similarly, the records of family or subfamily reference persons can be used in generating family and subfamily estimates.

Of course, many desired household characteristics are not already shown on household records or segments, but are derived by summarizing the characteristics of the persons in the household, as for example, the number of persons 65 years old and over in the household. Doing so with SIPP files is somewhat more complicated than with files in which person records are arranged in a strictly hierarchical fashion within household.

Household records in SIPP relational files carry pointers to each person who was a member of the household. There are five sets of pointers, one for each month of the reference period and one for the interview month. The rectangular file does not have these household-to-person pointers, but does identify the address ID of the household of which the person was a member each month. The file can be readily sorted on address ID within sample unit to group household members together for any particular reference month. Another option available to rectangular file users is to sort on the person number of the householder, provided on each household member's record.

### Estimates for groups of persons other than households and families

Some analyses involve summarizing to units other than households or families. The persons within a household who benefit from food stamps are one such example. Only part of a family may receive aid or there may be two separate food stamp units living together. For each food stamp receiving unit one adult household member is designated as the prime recipient. The SIPP questionnaire also identifies which children and other household members are covered by those food stamps.

Food stamp coverage is recorded on the SIPP files in two ways. First, the primary recipient's record includes the person numbers of each household member covered, and each of the other covered persons' records has a flag that indicates membership in a food stamp receiving unit. Only the primary recipient's record specifies the amounts of food stamps received for the unit.

To tabulate the characteristics of all food stamp recipients in a household, the easiest approach might be to sort recipients together within households using the reciprocity flags. But if it is necessary to discriminate between multiple food stamp receiving units within a household, the only way is to examine the primary recipient's record and use its list of person numbers to point to the secondary recipients in that unit. Then one could summarize appropriate characteristics across the person records. This way one could determine whether the food stamp reciprocity unit includes a wage-earner, is part of a family below the poverty level, lives together with persons who are not covered, and so forth.

Other programs for which there are pointers from the primary recipient's record to other recipients in the household include Medicaid, AFDC, foster children payments, general assistance, health insurance, Railroad Retirement, Social Security and veterans payments. In all of these cases, all income received by the unit, including payments for the benefit of children, are reported on the record of the primary adult recipient and not on the records of secondary recipients. The weight of the primary recipient is most likely to be appropriate in tabulations of food stamp reciprocity units and similar groups of individuals.

#### **Estimates for Different Reference Periods**

Each person and household is assigned 5 weights on each interview file, one for each of the four reference months and one for the interview month. Families and subfamilies are assigned only 4 weights since there is no attempt to define families as of the reference date. The 4 sets of reference month weights can be used only to form reference month estimates. Reference month estimates can be averaged, however, to form estimates of monthly averages over some period of time. For example, using the proper weights one can estimate the monthly average number of persons in a specified income range over the 4-month period.

The fifth weight is specific to the interview month. This weight can be used to form person or household estimates that specifically refer to characteristics as of the interview month. For example, one might want to estimate the number of unmarried adults living with an aged parent as of the latest observation. Interview weights can also be used to form estimates referring to the time period including the interview month and 4 previous months. One caution is that characteristics as of the interview date may not reflect that entire month--the persons could move, marry, or die before the end of the month.

The interview weight is also used for estimating a few of the demographic characteristics and other information that appear on the file for the 4-month reference period as a whole, but not for each month, such as race or sex.

None of these weights has been designed to yield the best estimates for a person's or household's status over two or more months, as for example, the number of households existing in October 1983 who experienced a 50 percent increase in income between July and August.

### Calendar Month Data and Time Dimensioned Summary Statistics

In tabulating SIPP data for a particular calendar month, one must keep in mind the survey design. Most waves include 4 rotation groups, interviewed in four successive months. Figure 2 is a schematic diagram of the 1984 Panel design.

Months, quarters and years are shown along the top. Each cell shows the wave and rotation groups for which data are collected for each month. Thus, in the first interview, conducted in October 1983, data were collected from Wave 1-Rotation Group 1 households for the months of June, July, August and September.

As successive rotation groups are interviewed, the 4-month reference periods advance by 1 month. Wave 1-Rotation Group 2 households were interviewed in November 1983 for data for July through October.

In deriving calendar month or quarterly estimates from the data files, it is important to know how many rotation groups were interviewed, as less than the full sample may be available. If this is the case, the estimates must be inflated by an appropriate factor.

In some months, a full sample of 4 rotation groups from the same wave will be available. For Wave 1 (see figure 2), data for September 1983 were collected from the full sample. These data consist of month 4 data for Rotation Group 1, month 3 data for Rotation Group 2, month 2 data for Rotation Group 3, and month 1 data for Rotation Group 4. All of these figures (with appropriate weights) must be added together because any one rotation group includes only one-fourth of the SIPP sample.

In deriving quarterly estimates, a full sample consists of data for 4 rotation groups for each of the 3 months in the quarter. This would entail using data from 2 or 3 waves. For example, the fourth quarter of 1983 includes various rotation groups from Waves 1 and 2. Weighted data from all these rotation groups must be added together to form a full sample.

Note, however, that a full sample is not available for the third quarter of 1983. Or for subsequent quarters, the analyst may not want to wait for another wave of data to become available. Procedures to use in deriving estimates based on a partial sample are explained below.

### Working With Less Than the Full Sample

Figure 2 also illustrates that for October 1983, data were collected from only three rotation groups of Wave 1. Thus the sample size available is three-fourths that available for September. The preferred way to handle this is to acquire Wave 2 as well, and combine October data for Wave 2-Rotation Group 1 with the Wave 1 October data for Rotation Groups 2, 3 and 4.

If a particular application does not require the full sample size, however, one could use only Wave 1 data for October and multiply weighted results by a factor of 1.33 to compensate for having only three-fourths of the sample. This is illustrated in figure 3.

FIGURE 3. Factors for Monthly Data: Wave 1, 1984 Panel

| <u>Month of<br/>Interview</u> | <u>Rotation<br/>Group</u> | <u>Reference Period</u> |            |             |                      |             |              |                       |             |             |
|-------------------------------|---------------------------|-------------------------|------------|-------------|----------------------|-------------|--------------|-----------------------|-------------|-------------|
|                               |                           | <u>Second Quarter</u>   |            |             | <u>Third Quarter</u> |             |              | <u>Fourth Quarter</u> |             |             |
|                               |                           | <u>Apr.</u>             | <u>May</u> | <u>June</u> | <u>July</u>          | <u>Aug.</u> | <u>Sept.</u> | <u>Oct.</u>           | <u>Nov.</u> | <u>Dec.</u> |
| October                       | 1                         |                         |            | X           | X                    | X           | X            |                       |             |             |
| November                      | 2                         |                         |            |             | X                    | X           | X            | X                     |             |             |
| December                      | 3                         |                         |            |             |                      | X           | X            | X                     | X           |             |
| January                       | 4                         |                         |            |             |                      |             | X            | X                     | X           | X           |

Factors to Compensate for Missing Rotation Groups

4      2    1.33   1    1.33   2    4

To use Wave 1 data for the month of November, double the estimates (which compensates for having only one half of the sample consisting of Rotation Groups 3 and 4), and for December multiply the estimates by 4 (since they are based on a one-fourth sample consisting of rotation group 4 alone). Corresponding factors apply to data for June, July and August (also available in Wave 1) as well, and for these months the factors must be used, as the alternative of picking up the missing rotation groups in another wave does not exist.

A similar approach is applicable to subsequent waves as well. The particular factor to use is determined by the number of rotation groups covered in the time period one is analysing. Factors for Waves 1 and 2 and combined Wave 1 and 2 estimates are given in Table 1 below.

Table 1. Factors to be Applied to Basic Parameters to Obtain Parameters for Specific Reference Periods

Wave 1 Estimates

|                           |      |
|---------------------------|------|
| June 1983, December 1983  | 4.00 |
| July 1983, November 1983  | 2.00 |
| August 1983, October 1983 | 1.33 |
| September 1983            | 1.00 |
| 3rd Quarter 1983          | 1.22 |
| 4th Quarter 1983          | 1.85 |
| July-December 1983        | 1.06 |

Wave 2 Estimates

|                                 |      |
|---------------------------------|------|
| October 1983 and March 1984     | 4.00 |
| November 1983 and February 1984 | 2.00 |
| December 1983 and January 1984  | 1.33 |
| 4th Quarter 1983                | 1.85 |
| 1st Quarter 1984                | 1.85 |

Wave 1 and 2 Combined Estimates

|                                 |      |
|---------------------------------|------|
| June 1983 and March 1984        | 4.00 |
| July 1983 and February 1984     | 2.00 |
| August 1983 and January 1984    | 1.33 |
| September through December 1983 | 1.00 |
| 3rd Quarter 1983                | 1.22 |
| 4th Quarter 1983                | 1.00 |
| 1st Quarter 1984                | 1.85 |
| July-December 1983              | 1.06 |

Factors must also be applied to quarterly estimates or those for longer periods of time if less than the full sample for any month is available. Thus, in table 1 a factor of 1.22 must be applied to third quarter 1983 estimates, 1.85 to fourth quarter estimates using either Wave 1 or Wave 2, but a factor of 1.00 (i.e., no factor is needed) for fourth quarter 1983 estimates using full sample data from the combined Wave 1 and Wave 2 files.

Caveats for Calendar Month Data ..

Although it is possible to examine the data on a monthly basis and examine the data in a strictly cross sectional sense, there are qualifications or biases in this type of analysis.

First, no evaluations have been made of responses to income and related variables that are provided on a monthly basis. There may be some biases in this reporting. For example, people may tend to report a rough monthly average for their income over the four month reference period rather than specifically recalling amounts separately for each month. If this were so it would not be possible to analyze real month-to-month changes in income figures.

Second, most data users have been able to work only with annual income figures to this point, using the census, CPS or other surveys which measure income only once during a year. There will be considerable temptation for SIPP users to return to familiar analytical ground by multiplying 4-month income figures by 3 to estimate 12-month income. To do so would ignore seasonal variation in employment and income. A better approach to annual income would be to match together the first several waves and look at actual income experience across 12 months, perhaps comparing the results to the annual income and taxation information reported in Wave 5.

### **Time-Dimensioned Summary Statistics**

An approach to analyzing these data that would reduce the biases just discussed for monthly estimates involves summarizing data across time. In this approach one calculates standard summary statistics such as counts, means, and modes across time as well as across individuals.

For example, instead of calculating the number of persons with incomes over \$3,000 for the month of July, one would calculate the number of persons with a mean monthly income of \$3,000 or more during the 3rd quarter.

This approach is relatively straightforward at the person level. However, at the family or household level, an additional complexity is added. One must first define these groups and identify the changes that occur during the quarter.<sup>1</sup> Then the conditions under which new groups are formed must be defined. Longitudinal concepts of households and families are the subject of a Working Paper, "Toward a Longitudinal Definition of Households" by David McMillen and Roger Herriot, available from the Census Bureau.

### **Producing Estimates Below the National Level**

#### **Census Regions**

The total estimate for a region is the sum of the state estimates in that region. However, one of the groups of states, formed for confidentiality reasons, crosses regional boundaries. This group consists of South Dakota

---

<sup>1</sup> These problems do not arise in Wave 1, as households were defined as of the interview and changes during the reference months were not recorded.

(Midwest Region), Idaho (West Region), New Mexico (West Region), and Wyoming (West Region). To compute the total estimate for the Midwest Region, a factor of .203 should be applied to the above group's total estimate and added to the sum of the other state estimates in the Midwest Region. For the West Region, a factor of .797 should be applied to the above group's total estimate and added to the sum of the other states in the West.

Estimates for regions included in the published SIPP reports reflect the actual region of residence, not the results of proration across the 4-state group. Thus there will be minor discrepancies between published regional totals and estimates derivable from microdata files for the Midwest and West regions.

Estimates from this sample for individual states are subject to very high variance and are not recommended. The State codes on the file are primarily of use for linking respondent characteristics with appropriate contextual variables (e.g., State-specific welfare criteria) and for tabulating data by user-defined groupings of States.

#### Producing Estimates for the Metropolitan Population

For 15 states in the SIPP sample, metropolitan or nonmetropolitan residence is identified. (On the rectangular file, use variable H<sup>3</sup>-METRO, characters 94, 382, 670, and 958. On the relational file, use METRO, character 24 on the household record). Metropolitan residence is defined according to the definition of Metropolitan Statistical Areas as of June 30, 1983. In 21 additional states, where the nonmetropolitan population in the sample was small enough to present a disclosure risk, a fraction of the metropolitan sample was recoded so as to be indistinguishable from nonmetropolitan cases (METRO=2). In these states, therefore, the cases coded as metropolitan (METRO=1) represent only a subsample of that population.

In producing state estimates for a metropolitan characteristic, multiply the individual, family, or household weights by the metropolitan inflation factor for that state, presented in Table 2 below. (This inflation factor compensates for the subsampling of the metropolitan population and is 1.0 for the states with complete identification of the metropolitan population).

In producing regional or national estimates of the metropolitan population it is also necessary to compensate for the fact that no metropolitan subsample is identified within two states (Maine and Iowa) and one state-group (Mississippi-West Virginia). (There were no metropolitan areas sampled in South Dakota-Idaho-New Mexico-Wyoming). Therefore, a different factor for regional and national estimates is in the right-hand column of Table 2 below. The results of regional and national tabulations of the metropolitan population will be biased slightly, although less than one-half of one percent of the metropolitan population is not represented.

Table 2. Metropolitan Subsample Factors

(Multiply these factors times the weight for the person,  
family or household)

|            |                      | Factors for use<br>in State or MSA<br>Tabulations | Factors for use<br>in Regional or<br>National Tabs |

- indicates no metropolitan subsample is shown for the State.

Estimates for the metropolitan population produced from the microdata files will differ from published summary figures for the metropolitan population not only because of the subsampling scheme but also because of differences in the definition of the metropolitan population. Published figures are based on Standard Metropolitan Statistical Areas (SMSA's) defined as of June 30, 1981, consistent with the definition for the 1980 census. The microdata files use the definitions for Metropolitan Statistical Areas (MSA's) as of June 30, 1983. That definitional change resulted in increasing the metropolitan population by 1.4 percent. Eventually, the published figures will also reflect 1983 MSA definitions.

#### **Producing Estimates for the Nonmetropolitan Population**

State, regional, and national estimates of the nonmetropolitan population cannot be computed directly, except for the 15 states where the factor in Table 2 is 1.0. In all other states, the cases identified as not in the metropolitan subsample (METRO=2) are a mixture of nonmetropolitan and metropolitan households. Only an indirect method of estimation is available: first compute an estimate for the total population, then subtract the estimate for the metropolitan population.

#### **Codes for Individual MSA's**

Codes for certain large individual MSA's are included on the microdata files, such as are State codes, to provide users some flexibility in defining higher level aggregate areas and to allow linking respondent characteristics to available contextual variables. Individual MSA codes are given if the MSA has at least 250,000 inhabitants in sampled counties within the state, and if its identification would not result in the indirect identification of residual metropolitan population less than 250,000. Sample sizes associated with individual MSA's are typically very small.

When creating estimates for particular identified MSA's or CMSA's apply the Table 2 factor to the weights appropriate to the state, as discussed above. For multi-state MSA's, use the factor appropriate to each state part. For example, to tabulate data for the Washington, DC-MD-VA MSA, apply the Virginia factor of 1.0778 to weights for residents of the Virginia part of the MSA; Maryland and DC residents require no modification to the weights (i.e., their factors equal 1.0). This may still not produce reasonable estimates for an individual MSA for three reasons: 1) the sample size is very small; 2) the MSA may be non-self-representing; and 3) certain counties added to MSA's between 1970 and 1983 may not have been included in the 1984-panel.

### Sampling Variability

Data found in SIPP publications or in user tabulations from the SIPP microdata are estimates based on the weighted counts from the survey. These numbers only approximate the far more costly counts that would result from a census of the entire population from which the sample was drawn. There are two types of errors possible in an estimate based on a sample survey: Sampling and non-sampling. We are able to provide estimates of the magnitude of SIPP sampling error, but this is not true of nonsampling error.

### Standard Errors and Confidence Intervals

Standard errors indicate the magnitude of the sampling error. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. The standard errors for the most part measure the variations that occurred by chance because a sample was surveyed instead of the entire population.

The sample estimate and its standard error enable one to construct confidence intervals, ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

## Hypothesis Testing

Standard errors may also be used for hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common types of hypotheses tested are 1) the population parameters are identical versus 2) they are different. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the parameters are different when, in fact, they are identical.

To perform the most common test, let  $X_A$  and  $X_B$  be sample estimates of two parameters of interest. A subsequent section explains how to derive a standard error on the difference  $X_A - X_B$ . Let that standard error be  $S_{DIFF}$ . Compute the ratio  $R = (X_A - X_B) / S_{DIFF}$ . If this ratio is between -2 and +2, no conclusion about the parameters is justified at the 5 percent significance level. If on the other hand, this ratio is smaller than -2 or larger than +2, the observed difference is significant at the 5 percent level.

In this event, it is a commonly accepted practice to say that the parameters are different. Of course, sometimes this conclusion will be wrong. When the parameters are, in fact, the same, there is a 5 percent chance of concluding that they are different.

## Calculating Standard Errors for SIPP

There are two ways for users to compute a standard error for SIPP estimates. One method is to compute variances directly using half-sample and pseudostratum codes. A second method involves calculating generalized standard errors using simple charts and formulas found in published reports or microdata documentation.

## Generalized Standard Errors

To derive standard errors that are applicable to a wide variety of statistics and can be prepared at a moderate cost, a number of approximations are required. Most of the SIPP statistics have greater variance than those obtained through a simple random sample because clusters of living quarters are sampled for SIPP.

Two parameters, denoted "a" and "b", have been developed to calculate variances for each type of characteristic. These "a" and "b" parameters, found in table 3, are used in estimating standard errors of survey estimates, and these standard errors are referred to as generalized standard errors.

All statistics do not have the same variance behavior; "a" and "b" parameters were computed for groups of statistics with similar variance behavior. The parameters were computed directly from SIPP 3rd quarter 1983 data.

Table 3. SIPP 1984 Generalized Variance Parameters

| Characteristic  | Basic Parameters |       |
|---|------------------|-------|
|   | a                | b     |
| 16+ total persons: program participation and benefits | -0.00009428      | 16059 |
| As above for 16+ total males                          | -0.00019844      | 16059 |
| As above for 16+ total females                        | -0.00017961      | 16059 |
| 16+ total persons: income, labor force                | -0.00003214      | 5475  |
| As above for 16+ total males                          | -0.00006765      | 5475  |
| As above for 16+ total females                        | -0.00006123      | 5475  |
| 0+ Total persons: all items                           | -0.00008637      | 19911 |
| As above for total males                              | -0.00017863      | 19911 |
| As above for total females                            | -0.00016724      | 19911 |
| Black persons: all items                              | -0.00026695      | 7366  |
| As above for Black males                              | -0.00057368      | 7366  |
| As above for Black females                            | -0.00049929      | 7366  |
| Total households: all items                           | -0.00007644      | 6766  |
| Black households: all items                           | -0.00046611      | 4675  |

The "a" and "b" parameters may be used to approximate the standard error for estimated numbers and percentages. Because the actual increase in variance was not identical for all statistics within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error rather than the precise standard error for any specific statistic. That is why we refer to these as generalized standard errors.

### Computing Variances Directly

Pseudo half-sample codes and pseudostratum codes (assigned in such a way as to avoid any disclosure risk) are included on the file to enable direct computation of variances by methods such as balanced repeated replications.<sup>2</sup> This method may be used if the user can not use the generalized standard errors, as in computing the variance of a correlation coefficient between, say, interest income and dividend income. Since a number of statistical software packages provide simple procedures for using half-sample codes, you may consult documentation for your statistical software for further discussion. The Census Bureau, however, does not vouch for the appropriateness or accuracy of such software.

Variances computed directly will vary from variances estimated by the Census Bureau. These differences are a result of the use of artificial stratum codes on the public use file, whereas the Census Bureau has access to the actual stratum identifiers. Actual stratum codes are withheld from the public-use microdata so as to avoid identifying geographic areas so small that they risk disclosure of confidential information.

Even though these are artificial stratum codes, the variance estimates are expected to be similar to those produced by the Bureau using the real stratum codes. This method is involved, may be expensive, and, of course, is available only to users of SIPP microdata, not users of SIPP publications.

### Examples Using Generalized Standard Errors

Some examples illustrate the use of "a" and "b" parameters in Table 3 for computing a standard error and the corresponding confidence intervals.

#### Standard Error of Total

The formula for computing the standard error for a total is:

$$s = \sqrt{ax^2 + bx} \quad (1)$$

---

<sup>2</sup>William G. Cochran provides a list of references discussing the application of this technique in Sampling Techniques, 3rd Ed. (New York: John Wiley and Sons, 1977), p. 321.

where "a" and "b" are the parameters associated with the estimate for the particular reference period and x is the weighted estimate.

Based on a tabulation from the SIPP survey data you would find that there were 16,000,000 households with a mean monthly income during the 3rd quarter of 1983 of \$3,000 and over. Suppose you want to develop a 95% confidence interval so you can assess how precise the estimate of 16,000,000 is.

**Step 1:**

Determine the appropriate "a" and "b" parameters by looking them up in table 3. Since we are dealing with income data for all households the "a" and "b" parameters are -.00007644 and 6766.

**Step 2:**

Enter these figures in the above formula

$$\begin{aligned}
 s &= \sqrt{ax^2 + bx} \\
 &= \sqrt{(-.00007644) \times (16,000,000)^2 + (6766 \times 16,000,000)} \\
 &= 297,804.231
 \end{aligned}$$

where 16,000,000 is the estimate, and -.00007644 and 6766 are the "a" and "b" parameters. The resulting standard error (rounded off) is 297,804.

**Step 3:**

To determine the 95% confidence interval of the estimate, multiply 2 times the standard error, yielding 595,608. The lower bound of the confidence interval is then 16,000,000 minus 595,608 or roughly 15.4 million, and the upper bound is 16,000,000 plus 595,608 or roughly 16.6 million.

Thus we can conclude with 95% confidence that the average estimate derived from all possible samples lies within the interval of 15.4 million to 16.6 million.

The foregoing example assumes you are working with the full SIPP sample, as will normally be the case with SIPP reports and user tabulations. But if you are making a tabulation from SIPP microdata for a reference month for which you do not have data for all rotation groups, you must weight the estimate up by an appropriate factor to compensate for the smaller sample size; you must similarly adjust the estimates of variance.

When you are working with fewer than all 4 rotation groups, the formula becomes

$$s = \sqrt{ax^2 + bx} \cdot \sqrt{f} \quad (2)$$

where the first part of the expression is the same as before, and "f" is a factor compensating for sample size. In other words, when the estimate is weighted up by a factor, the standard error must be multiplied by the square root of the same factor.

The "f" factors for various reference periods are found in table 1 above. The standard error in the above example was 297,804. If we were working with data for July 1983, a month covered by only the first two rotation groups in Wave 1 (see figure 2), our initial estimate using the weights on the microdata file might have been 8,000,000. To compensate for the 2 missing rotation groups, we would apply the factor of 2.0, and thereby double our estimate to 16,000,000. The same factor would enter into the formula in equation (2) to give

$$s = 297,804 \times \sqrt{2.0} = 421,158$$

as the standard error of an estimated 16,000,000 based on 2 rotation groups instead of 4. The confidence interval is then determined in the same way, using this revised standard error.

Wave 1 represents a special case because there are 3 reference months at the start of the survey when the survey did not yet cover all four rotation groups. Only one rotation group has data for June 1983, two for July 1983, and three for August 1983. The first SIPP report included data for the third quarter 1983.

For that period of partial coverage a factor of 1.22 is appropriate, as shown in table 1. If wave 1 data were used to estimate the 4th quarter, the factor would be 1.85. Of course, wave 2 supplies the missing rotation groups for that quarter. If wave 1 and wave 2 files were used together, estimates could be made from the full sample, so that no factor adjustment would be needed. Since the factors associated with the metropolitan area subsample are generally very close to 1.0, the factors may be ignored in calculating variances for metropolitan summaries.

#### Standard Error of a Percent

Computing the standard error and confidence interval for a percent follows a similar procedure. The formula for the generalized standard error of a percent is:

$$s = \sqrt{\frac{b}{y} p(100-p)} \cdot \sqrt{f} \quad (3)$$

where

y = the base of the percent (use weighted estimate), i.e., the size of the subclass of interest,

p = the percentage of persons, families, or households possessing the characteristic of interest,

b = the larger of the "b" parameters for the numerator and denominator, and,

f = the factor to adjust for missing rotation groups if necessary.

Note that the "a" parameter is not used.

Suppose we find that of the households in Wave 1 who had a mean monthly income of \$3,000 and over in the third quarter of 1983, 8,916,000 (8.6%) were black. To construct a 95% confidence interval, follow the steps shown below.

**Step 1:**

Examine the "b" parameter in table 3 for both total and black households to determine the larger of the two. In this case the "b" parameter for total households, 6766, is larger.

The "f" factor from table 1 that is applied to the base parameters to adjust for incomplete data is 1.22, applicable to 3rd quarter data.

**Step 2:**

Entering the values into the formula in equation (3):

$$s = \sqrt{\frac{6766}{8,916,000} (8.6)(100-8.6)} \cdot \sqrt{1.22}$$

provides us with a standard error of 0.85 percent.

**Step 3:**

Multiplying the standard error by 2 and adding and subtracting this quantity from the estimate of 8.6% provides a 95% confidence interval of 6.9% to 10.3%.

### Standard Error of a Difference

The standard error of a difference between two sample estimates is approximately equal to

$$s_{(x-y)} = \sqrt{s_x^2 + s_y^2 - 2rs_x s_y} \quad (4)$$

where  $s_x$  and  $s_y$  are the standard errors of the estimates  $x$  and  $y$ . The estimates can be numbers, percents, ratios, etc. The correlation between  $x$  and  $y$  is denoted by the correlation coefficient  $r$ .<sup>3</sup> Table 4 presents the correlation coefficients  $r$  for comparisons between months and between quarters. For other types of comparisons, assume  $r$  equals zero if it is believed that the value of one variable does not give a strong indication of the value of the other variable. If  $r$  is really positive then this assumption will lead to overestimates of the true standard error. If  $r$  is negative, the result will be an underestimate of the actual standard error.

As an illustration, SIPP estimates show that the number of persons in nonfarm households with mean monthly household cash income over \$4,000 during the third quarter of 1983 who were aged 35-44 years was 5,313,000 and the number of those aged 25-34 years was 4,353,000, an estimated difference of 960,000. Using the Wave 1 parameters  $a = -.00003214$ ,  $b = 5475$ , and  $f = 1.22$  in equation (2), the standard errors of the estimates for each age group are 185,422 and 168,324 respectively. It is reasonable to assume that these two estimates are not highly correlated. Therefore, the standard error of the estimated difference of 960,000 is

$$\sqrt{(185,422)^2 + (168,324)^2} = 250,428$$

Suppose that it is desired to test the estimated difference at the 95 percent confidence level. The estimated difference divided by the standard error of the difference,  $960,000/250,428$ , is 3.83. Since this is greater than 2 it is concluded that the difference is significant at the 95 percent confidence level.

#### Standard Error of a Mean

A mean is defined here to be the average quantity of some item (other than persons, families, or households) per person, family, or household. For example, it could be the average monthly household income of females aged 25 to 34. The standard error of a mean can be approximated by the formula below. Because of the approximations used in developing the formula, an estimate of the standard error of the mean obtained from that formula will generally underestimate the true standard error. The formula used to estimate the standard error of a mean  $\bar{x}$  is

$$s_{\frac{\bar{x}}{x}} = \sqrt{\frac{b}{y} s^2} \cdot \sqrt{f} \quad (5)$$

<sup>3</sup>The correlation coefficient measures the extent to which the value of one variable gives an indication of the value of another variable. An example of a positive correlation is that between food stamp and AFDC reciprocity. Food stamp and bond income reciprocity are variables possessing a negative correlation. Another example of variables with positive correlation occurs when it is desired to measure the difference in a variable between two months or quarters.

where  $y$  is the size of the base,  $s^2$  is the estimated variance of  $x$ ,  $b$  is the parameter associated with the particular type of item, and  $f$  is the adjustment factor.

The estimated population variance,  $s^2$ , is given by formula (6):

$$s^2 = \frac{\sum_{i=1}^n w_i x_i^2}{\sum_{i=1}^n w_i} - \bar{x}^2 \quad (6)$$

where there are  $n$  persons with the item of interest;  $w_i$  is the final weight for person  $i$ ; and  $x_i$  is the value of the estimate for person  $i$ .

If the calculation of  $s^2$  using formula (6) is too cumbersome, then formula (7) may be used instead:

$$s^2 = \sum_{i=1}^c p_i x_i^2 - \bar{x}^2 \quad (7)$$

where each person (or other unit of analysis) is in one of  $c$  groups (e.g., income categories within an income distribution); the  $p_i$ 's are the estimated proportions of responses within each group; the  $x_i$ 's are the midpoints of each group. If group  $c$  is open-ended, i.e., no upper interval boundary exists, then an approximate average value is

$$x_c = \frac{3}{2} Z_{c-1} \quad (8)$$

where  $Z_{c-1}$  is the lower boundary of the group (e.g., \$75,000 in the category \$75,000 or more). If an open-ended group  $c$  does exist, the approximation could easily be bad. To reduce this danger, create data categories so as to keep  $c$  and  $Z_{c-1}$  large. This could be done by creating more categories, e.g., more income groups.

#### Standard Error of a Mean Number of Persons with Characteristic Per Family or Household

Mean values for persons in families or households may be calculated as the ratio of two numbers. The denominator,  $y$ , represents a count of families or households of a certain class, and the numerator,  $x$ , represents a count of persons with the characteristic under consideration who are members of these families or households. For example, the mean number of children per family with children is calculated as

$$\frac{x}{y} = \frac{\text{total number of children in families}}{\text{total number of families with children}}$$

For means of this kind, the standard error is approximated by the following formula:

$$s\left(\frac{x}{y}\right) = \sqrt{\left(\frac{x}{y}\right)^2 \left[ \left(\frac{s_y}{y}\right)^2 + \left(\frac{s_x}{x}\right)^2 - 2r \left(\frac{s_x}{x}\right)\left(\frac{s_y}{y}\right) \right]} \quad (9)$$

The standard error of the estimated number of families or households is  $s_y$ , and the standard error of the estimated number of persons with the characteristic is  $s_x$ . In the formula,  $r$  represents the correlation coefficient between the numerator and the denominator of the estimate. If at least one member of each family or household in the class possesses the characteristic of interest, then use 0.7 as an estimate of  $r$ . If, on the other hand, it is possible that no member of a family or household has the characteristic, then use  $r = 0$ . In the example, you would use  $r = 0.7$  for the average number of persons per family, but  $r = 0$  for the average number of teenagers per family.

#### Standard Error of a Median

To compute a median, first group the units of interest (e.g., persons) into cells by the value of the statistic under consideration (e.g., single years of age). Then form a cumulative density for the cells (e.g., by cumulatively adding the proportion of persons of each age). Identify the first cell with cumulative density greater than 0.5. Use interpolation to find the value of the characteristic that corresponds to cumulative density 0.5. That value is the estimated median. Different methods of interpolation may be used. The most common are simple linear interpolation and pareto interpolation. No universal rules exist on which method to use. The best procedure is to define the cells (e.g., income intervals) to be so small that the method of interpolation does not matter.

The sampling variability of an estimated median depends upon the form of the distribution as well as the size of its base or class. Given that the data were grouped into intervals (e.g., income intervals), then the standard error of a median is given by

$$\frac{\sqrt{N} (A_2 - A_1)}{2(N_2 - N_1)} = \frac{\sqrt{N} W}{2F} \quad (10)$$

or

$$\frac{\sqrt{N} \ln(A_2/A_1)}{\sqrt{N} \ln[(N-N_1)/(N-N_2)]} \quad (11)$$

depending on whether the linear (10) or the Pareto (11) interpolation was used for estimating the median, where

- $M$  = the estimated median  
 $A_1$  and  $A_2$  = the lower and upper boundaries of the interval in which the median falls,  
 $W$  =  $A_2 - A_1$ , the width of the interval in which the median falls,  
 $N_1$  and  $N_2$  = the number of units with the characteristic (e.g., income) less than  $A_1$  and  $A_2$ , respectively,  
 $F$  =  $N_2 - N_1$ , the number of units in the interval in which the median lies,  
 $N$  = the total number of units in the frequency distribution,  
 $b$  = the appropriate value of the parameter "b".

The following example illustrates the computation of the standard error of a median using linear interpolation. SIPP estimates from the report, "Economic Characteristics of Households in the United States: Third Quarter 1983," Series P-70, No. 1, table 1, show that the estimated median of the average monthly household cash income of females in the third quarter of 1983 was \$1,841 and  $N = 115,848,000$ . The appropriate "b" parameter from table 3 of this chapter is 19,911, which must be multiplied by the 3rd quarter factor of 1.22, yielding 24,291. We used the interval defined by  $A_1 = \$1,600$ ,  $A_2 = \$1,999$ ,  $N_1 = 50,084,000$ , and  $N_2 = 62,087,000$ . So  $W = \$399$  and  $F = 12,003,000$ . Using the formula in equation (10) above the approximate standard error is

$$\sqrt{\frac{(24,291)(115,848,000)(\$399)}{2(12,003,000)}} = \$27.88 \quad (12)$$

Thus, rounding to \$28, the 68 percent confidence interval of the median is from \$1,813 to \$1,869, and the 95 percent confidence interval is from \$1,785 to \$1,897.<sup>4</sup>

---

<sup>4</sup>The standard error of \$27.88 computed here differs from the standard error of the median found in the report referenced in the text. Since publication of the report, new parameters in table 3 of this chapter were developed based entirely on SIPP data. These parameters, given in this chapter, are to be used in place of those given in the Source and Reliability sections of that report or the Wave 1 Technical Documentation.

### Standard Errors of Ratios of Means or Medians

In this section, the correlation between the numerator and denominator,  $r$ , is assumed to be zero. So, the standard error for a ratio of means or medians is approximated by this formula:

$$s\left(\frac{x}{y}\right) = \sqrt{\left(\frac{x}{y}\right)^2 \left[\left(\frac{s_y}{y}\right)^2 + \left(\frac{s_x}{x}\right)^2\right]} \quad (13)$$

The standard errors of the two means or medians are  $s_x$  and  $s_y$ . If  $r$  is actually positive (negative), then this procedure will provide an overestimate (underestimate) of the standard error for the ratio of means and medians.

### Nonsampling Error

In addition to sampling error, discussed above, nonsampling errors are also present in SIPP data. Nonsampling errors can be attributed to many sources.

#### Undercoverage

Some housing units may have been missed in the listing operation prior to sampling; sometimes persons are missed within a sampled household. Past studies of censuses and household surveys have shown that undercoverage varies by age, race, and residence. Ratio estimation to independent age-sex-race population controls partially corrects for the bias due to survey undercoverage. However, biases exist in those estimates insofar as the characteristics of missed persons differ from those of respondents in each age-sex-race group. Further, the independent population controls have not been adjusted for undercoverage in the decennial census. Undercoverage in SIPP relative to the independent controls is about 7 percent for both Wave 1 and Wave 2. The undercoverage rate is likely to increase in subsequent waves due to lack of complete coverage of immigrants, institutional discharges, and movers from military barracks.

#### Respondent and Enumerator Error

Persons may have misinterpreted certain questions, or there may be an inability or unwillingness to provide the correct information. One source of such inability arises when one household member responds for other members. In another, a number of evaluation programs from the decennial census have suggested that some persons tend to underreport their income. Or, there may be a problem in recalling information, though the shorter reference period employed in SIPP should reduce this problem. The greater detail in SIPP questions and the training of interviewers should help prompt more complete income reporting than in other surveys.

## Processing Error

Errors may have been introduced in the handling of the questionnaires by the Census Bureau. The coding of write-in entries for occupation, for instance, is subject to a certain level of mistakes.

## Nonresponse

Nonresponse to particular questions in the survey also allow for the introduction of bias into the data, since the characteristics of nonrespondents may differ from those of respondents.

The initial evaluation of the quality of the data from SIPP show improvements in the accuracy and completeness of the data on income and program participation over that obtained from March CPS. For the third quarter of 1983, SIPP nonresponse rates ranged from a low of about 3 percent for questions about Aid to Families with Dependent Children and food stamp allotments, to about 13 percent for those concerning self-employment income. These rates contrast sharply with the higher nonresponse rates from the March CPS. The rates for CPS range from a low of 9 percent for food stamp allotments to 24 percent for self-employment income.

The reasons attributed to the improvement in the measurement of income are SIPP's shorter recall period, and more emphasis in SIPP on complete and accurate reporting of income data. For example, in determining assets respondents are asked about type of ownership (whether jointly held) as well as value. Respondents are called back when information is incomplete.

The nonresponse rate for monthly wage and salary income overall averaged about 6.2 percent for the initial SIPP interviews. However, proxy responses caused significantly higher nonresponse rates for some of the key items.

The nonresponse rate for self-respondents, which accounted for 64 percent of the total, was 4.6 percent, while the rate for proxy respondents was 9.0 percent.

Noninterview rates for the first two waves of SIPP are 4.8 percent for Wave 1 and 9.4 percent for Wave 1 and Wave 2 combined. Most of these cases (77 percent) were refusals, but other cases included "no one at home" and "temporarily absent". These rates are an improvement on the rates experienced in the Income Survey Development Program (ISDP), a predecessor to SIPP, and are comparable with rates obtained in CPS. Since SIPP does not replenish a panel in the same manner as CPS, the SIPP noninterview rate will climb considerably above the monthly CPS rate. The Bureau has used complex techniques to adjust the weights for nonresponse, but the success of these techniques in avoiding bias is unknown.

Data quality issues in SIPP are also discussed in "Economic Characteristics of Households in the United States: Fourth Quarter 1983," Series P-70-83-4, Appendix D. This appendix includes comparisons of nonresponse in SIPP and the

March 1984 CPS, as well as comparisons of estimates derived from SIPP with independent estimates for several income types.

### Imputation

There are almost no missing data on SIPP microdata files. Nonresponse by an entire household is dealt with in the weighting procedures. That is, noninterviewed households are given zero weights and interviewed households are weighted up to compensate. When an individual within the household refuses the interview or when a response to an individual question is missing, beginning with Wave 2, census computers make imputations for the missing data. For Wave 1, nonresponse to an entire questionnaire by an individual caused the household to receive a zero weight. If the person answered a certain minimum group of questions in Wave 1, the responses to the other items were imputed. Imputations involve the replacement of missing data after Wave 1 with a corresponding value from a housing unit or person having certain other characteristics in common with the unit or person in question.

In general this imputation procedure enhances the usefulness of the data. It simplifies processing for the microdata user by eliminating "not reported" categories. Imputation also enhances the accuracy of the data on targeted characteristics. By imputing a missing characteristic with that of someone similar in other key aspects, the user can work with a more complete data set. When an imputed characteristic is aggregated over a sizable number of persons, deviations from actual (unknown) values tend to even out. Using imputed values also yields more accuracy than substituting the mean for missing data, since the mean would be based on persons perhaps substantially different from those with the missing items. On the other hand, use of imputed values can harm the accuracy of characteristics that were not targeted. The targeted characteristics concern socioeconomic stratum.

### Inclusion of Imputation Flags

If the characteristics of nonrespondents are systematically different from the characteristics of respondents, as may well be the case for income variables, then it is possible that the imputation system masks certain biases due to nonresponse. For this reason the SIPP microdata files include flags for many data items which allow the user to discriminate between those responses which were actually reported and those entries which were supplied through imputations. These flags, or imputation indicators, appear at the end of the household, person and income records in the SIPP relational microdata file, and at the end of appropriate sections within the records of the rectangular file, generally corresponding one-for-one with specific data items.

In the example in figure 4, the data item for earned income received from a particular job in a particular month is shown on the top half. A sample value of 2000 is illustrated, i.e., \$2000 of income last month. Its corresponding imputation flag is shown on the bottom half. Note that the description of the impu-

tation flag cites the field name for the corresponding item, WS1-2032. The sample value of 1 in the imputation flag indicates that the original respondent failed to answer the corresponding question, or the entry supplied was unusable for some reason, and that therefore the information in the data item above was imputed from that of another person.

In examining only the income amounts, one would not know that the \$2000 was imputed rather than actually reported by the individual. Only by crosstabulating income by imputation status can one recognize an imputed income.

| 1 .Imputed input   |   |      |               |

#### Editing

There are also a number of demographic characteristics from the control card which should not require imputation, but may need to be edited for consistency with other information from the household. In these cases there are no imputation flags, but the file includes both the edited value and the value prior to computer editing, referred to as preedited or unedited. These items are identified by a "U" at the start of the 8-character mnemonic identifying variables in the data dictionary. To detect whether a particular edit had any impact on the data, compare a given data item with its preedited or unedited counterpart.

#### Uses of Imputation Flags

Although the Bureau could theoretically evaluate the above-cited sources of error—undercoverage, respondent and enumerator error, processing error and nonresponse—it does not do so for SIPP. Thus it is not possible to provide adjustment factors which could somehow be used to "correct" data. On the other hand, the user of the microdata files can study the impact of imputations made for nonresponse.

An analyst can use imputation flags or unedited items in several different ways. First, by computing the rate of imputation one can evaluate the quality of certain data items. For instance, one could find out whether persons receiving aid from the government are less likely to report their other sources of income than persons not participating in such programs.

Imputation flags allow characteristics of nonrespondents to be studied. Do nonrespondents tend to be younger or older, for example, than the rest of the population?

One can exclude imputed data from crosstabulations that might be sensitive to the imputation process. For instance, in comparing the earnings of doctors and dentists, high imputation rates might make the tabulations questionable, since missing income on a doctor's or dentist's record would be imputed from a pool of possible donors which includes a much broader range of professional occupations. Thus, to make sure you are comparing only doctor's incomes with dentist's incomes, it would be appropriate to exclude all cases with either occupation or income imputed.

May 1986

Additions to the Survey of Income and Program Participation (SIPP) Working Papers and report series are now available. These additions include:

- ° The Working Papers (Nos. 8401-8407, Nos. 8501-8507, and Nos. 8601, 8602, 8604, and 8607.
- ° Compilation of papers presented in the SIPP sessions at the American Statistical Association meetings in August 1984 and August 1985.
- ° "Economic Characteristics of Households in the United States" (Current Population Report Series P-70, Nos. 1-5)
- ° A special issue of the Journal of Economic and Social Measurement containing the proceedings of a conference sponsored by the National Science Foundation, the Social Science Research Council and the Census Bureau. The table of contents of this issue is attached for your information.

SIPP public-use microdata files can be purchased through the Census Bureau's Data User Services Division (301-763-4100). Another way of accessing SIPP data is through the University of Wisconsin's Research Network and Data Center for SIPP. Call Alice Robbin at (608) 262-4574 or Martin David at (608) 262-3281 for more information.

See the attached listing for a description of the available products from the Survey of Income and Program Participation (SIPP). Please note that Working Paper 8401 was revised in December 1985 to account for program additions and changes which took place in 1985. If you want to receive any of these products, put a check by the appropriate number and mail to:

Daniel Kasprzyk, Special Assistant  
Population Division, Room 2025-3  
Bureau of the Census  
Washington, D.C. 20233

## COMPILATIONS OF ASA PAPERS FOR 1984 AND 1985

In August 1984, five sessions concerning SIPP were included in the Annual meeting of the American Statistical Association in Philadelphia, PA. The papers presented in these sessions have been consolidated in: "Survey of Income and Program Participation and Related Longitudinal Surveys: 1984."

This volume not only includes the final version of some of the papers offered in the SIPP Working Paper Series, Nos. 8402-8407, but also includes papers that were unavailable at the time the working papers were released, and papers from the discussants at the meeting. These papers include:

"An Analysis of Turnover in the Food Stamp Program," written by T. Carr and I. Lubitz, Mathematica Policy Research, Inc.

"Using Subjective Assessments of Income to Estimate Family Equivalences Scales: A Report on Work in Progress," written by D. Vaughan, Social Security Administration.

"Longitudinal Item Imputation in a Complex Survey," written by M. E. Samuël and V. Huggins, Census.

"The German Socio-Economic Panel," written by Ute Hanefeld, Deutsches Institut für Wirtschaftsforschung.

"Household Market and Nonmarket Activities--The First Year of a Swedish Panel Study," written by N. Anders Klevmarken, University of Göteborg, Sweden.

"The Australian National Longitudinal Survey," written by Ian McRae, Bureau of Labour Market Research, Australia.

In August 1985, two sessions concerning SIPP were included in the ASA meeting held in Las Vegas, Nevada. The papers are consolidated in "Survey of Income and Program Participation: 1985."

These papers are included:

"Item Nonresponse in the Survey of Income and Program Participation," written by D. B. McMillen and D. Kasprzyk, Census.

"Characteristics of Sample Attrition in the Survey of Income and Program Participation," written by E. McArthur and K. S. Short, Census.

"Compensating for Wave Nonresponse in the 1979 ISDP Research Panel," written by G. Kalton, J. Lepkowski, and Ting-Kwong Lin, University of Michigan.

"Alternative Definitions of Longitudinal Households in the Income Survey Development Program: Implications for Annual Statistics," written by C. F. Citro, Census.

COMPILATIONS OF ASA PAPERS  
FOR 1984 AND 1985

Page 2

"Do We Learn From the Past Experience When Constructing Complex Data?," written by P. Doyle, Mathematica Policy Research, Inc.

"Operationalizing the Poverty Line in a Survey Using Subannual Reference Periods," written by D. Vaughan, Social Security Administration.

"Short Term Change in Household and Family Structure," written by H. Koo, Research Triangle Institute.

"Characteristics of Program Participants: Some Early Evidence From SIPP," written by D. B. McMillen, Census.

"An Exploration of the Applicability of Hazards Models in Analyzing the Survey of Income and Program Participation: Labor Force Transitions," written by K. S. Short and K. Woodrow, Census.

"Gross Changes in Income Reciprocity from the Survey of Income and Program Participation," written by D. Burkhead and J. Coder, Census.

"Designing a Data Center for SIPP: An Observatory for the Social Sciences," written by M. David, University of Wisconsin.

## APPENDIX B-GLOSSARY OF SELECTED TERMS

**Population coverage.** The estimates are restricted to the civilian noninstitutional population of the 50 States and members of the Armed Forces living off post or with their families on post.

**Farm-nonfarm residence.** The farm population refers to rural residents living on farms. Under this definition, a farm is any place in rural territory from which sales of crops, livestock, and other agricultural products amounted to \$1,000 or more during the previous 12-month period.

**Householder.** Survey procedures call for listing first the person (or one of the persons) in whose name the home is owned or rented. If the house is owned jointly by a married couple, either the husband or the wife may be listed first, thereby becoming the reference person, or householder, to whom the relationship of the other household members is recorded. One person in each household is designated as the "householder." The number of householders, therefore, is equal to the number of households.

**Household.** A household consists of all persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters; that is, when the occupants do not live and eat with any other persons in the structure and there is either (1) direct access from the outside or through a common hall or (2) a kitchen or cooking equipment for the exclusive use of the occupants.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit or a group of unrelated persons sharing a housing unit as partners is also counted as a household. The count of households excludes group quarters. Examples of group quarters include rooming and boarding houses, college dormitories, and convents and monasteries.

**Family.** A family is a group of two or more persons (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such persons (including related subfamily members) are considered members of one family.

**Family household.** A family household is a household maintained by a family; any unrelated persons (unrelated subfamily members and/or secondary individuals) who may be residing there are included. The number of family households is equal to the number of families. The count of family household members differs from the count of family members, however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives.

**Nonfamily household.** A nonfamily household is a household maintained by a person living alone or with nonrelatives only.

**Race.** The population is divided into groups on the basis of race: White; Black; American Indian, Eskimo, or Aleut; Asian or Pacific Islander; and "other races."

Persons of Spanish origin. Persons of Spanish origin were determined on the basis of a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (or the origin of some other household member) from a "flash card" listing ethnic origins. Persons of Spanish origin, in particular, were those who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or some other Spanish origin. It should be noted that persons of Spanish origin may be of any race.

Work disability. Persons were classified as having a work disability if they were identified by the respondent as having a physical, mental, or other health condition that limits the kind or amount of work they can do.

Monthly income. The monthly income estimates for households are based on the sum of the monthly income received by each household member age 15 years old or over.

Cash income includes all income received from any of the sources listed in Appendix B-1. Rebates, refunds, loans, and capital gain or loss amounts from the sale of assets, and interhousehold transfers of cash such as allowances are not included. Accrued interest on Individual Retirement Accounts, KEOUGH retirement plans, and U.S. Savings bonds are also excluded. This definition differs somewhat from that used in the annual income reports based on the March CPS income supplement questionnaire. These data, published in the Consumer Income Series, P-60, are based only on income received in a regular or periodic manner and, therefore, exclude lump-sum or one-time payments such as inheritances and insurance settlements. The March CPS income definition, however, does exclude the same income sources excluded by SIPP.

The income amounts represent amounts actually received during the month, before deductions for income and payroll taxes, union dues, Part B Medicare premiums, etc.

The SIPP income definition includes three types of earnings: wages and salary, nonfarm self-employment, and farm self-employment. The definition of nonfarm self-employment and farm self-employment is not based on the net difference between gross receipts or sales and operating expenses, depreciation, etc. The monthly amounts for these income types are based on the salary or other income received from the business by the owner of the business or farm during the 4-month reference period.

The Bureau of Labor Statistics publishes quarterly averages for an earnings concept called "usual weekly earnings" for employed wage and salary workers. The concept differs from the SIPP earnings concept since it is based on usual, not actual earnings, excludes the self-employed, and excludes earnings from secondary jobs.

While the income amounts from most sources are recorded monthly for the 4-month reference period, property income amounts, interest, dividends, rental income, etc., were recorded as totals for the 4-month period. These totals were distributed equally between months of the reference period for purposes of calculating monthly averages.

**Means-tested benefits.** The term means-tested benefits refers to programs that require the income or assets (resources) of the individual or family be below specified guidelines in order to qualify for benefits. These programs provide cash and noncash assistance to the low-income population. The major sources of means-tested cash and noncash assistance are shown in Appendix B-2.

**Medicare.** This term refers to the Federal Health Insurance Program for the Aged and Disabled as provided for by Title XVIII of the Social Security Act. The phrase "Medicare covered" refers to persons enrolled in the Medicare program, regardless of whether they actually utilized any Medicare covered health care services during the survey reference period.

**Medicaid.** This term refers to the Federal-State program of medical assistance for low-income individuals and their families as provided for by Title XIX of the Social Security Act. The phrase "Medicaid covered" refers to persons enrolled in the Medicaid program, regardless of whether they actually utilized any Medicaid covered health care services during the survey reference period.

**Unemployment compensation.** This term refers to cash benefits paid to unemployed workers through a State or local unemployment agency. These include all benefits paid under the Federal-State unemployment insurance program as established under the Social Security Act, as well as those benefits paid to State and local government employees, Federal civilian employees, and veterans.

**Low-Income Home Energy Assistance Program.** Benefits from the Federally funded LIHEAP authorized by Title XXVI of the Omnibus Budget Reconciliation Act of 1981, or comparable assistance provided through State funded assistance programs, may be received in the form of direct payment to the household as reimbursement for heating or cooling expenses or paid directly to the fuel dealer or landlord.

**Special Supplemental Food Program for Women, Infants, and Children (WIC).** Benefits are received in the form of vouchers that are redeemed at retail stores for specific supplemental nutritious foods. Eligible low-income recipients are infants and children up to age five and pregnant, postpartum, and breastfeeding women.

**With a job.** Persons are classified "with a job" in a given month if they were 16 years old or over and, during the month, either (a) worked as paid employees or worked in their own business or profession or on their own farm or worked without pay in a family business or farm or (b) were temporarily absent from work either with or without pay. In general, the word "job" implies an arrangement for regular work for pay where payment is in cash wages or salaries, at piece rates, in tips, by commission, or in kind (meals, living quarters, supplies received). "Job" also includes self-employment at a business, professional practice, or farm. A business is defined as an activity which involves the use of machinery or equipment in which money has been invested or an activity requiring an office or "place of business" or an activity which requires advertising; payment may be in the form of profits or fees.

The Current Population Survey (CPS), the official source of labor force statistics for the Nation, uses the same definition for a job or business. The term "with a job," however, should not be confused with the term "employed" as used in the CPS. "With a job" includes those who were temporarily absent from a job because of layoff and those waiting to begin a new job in 30 days; in the CPS these persons are not considered "employed." See "Worked each week" below.

Worked each week. Persons "worked each week" in a month if, for the entire month, they were "with a job" and not "absent without pay" from the job. In other words, a person worked each week in any month when they were (a) on the job the entire month, or (b) they received wages or a salary for all weeks in the month, whether they were on the job or not. Persons also worked each week if they were self-employed and spent time during each week of the month at or on behalf of the business or farm they owned, as long as they received or expected to receive profit or fees for their work.

In the CPS, the concept "at work" includes those persons who spent at least 1 hour during the reference week at their job or business. In the CPS, however, "at work" does not include persons who were temporarily absent from their jobs during the entire reference week on paid vacation, sick leave, etc. In SIPP, "worked each week" does include persons on paid absences.

Absent 1 or more weeks. Absent 1 or more weeks means absent without pay from a job or business. Persons were absent without pay in a month if they were "with a job" during the entire month, but were not at work at that job during at least 1 full week (Sunday through Saturday) during the month, and did not receive wages or a salary for any time during that week. Reasons for an unpaid absence include vacation, illness, layoff, bad weather, labor disputes, and waiting to start a new job.

Looking for work. Persons who "looked for work" in a given month are those who were 16 years old or over and (a) were without a job during at least 1 week during the month, (b) tried to get work or establish a business or profession in that week, and (c) were available to accept a job. Examples of jobseeking activities are (1) registering at a public or private employment office, (2) meeting with prospective employers, (3) investigating possibilities for starting a professional practice or opening a business, (4) placing or answering advertisements, (5) writing letters of application, and (6) being on a professional register.

The CPS uses a similar concept of "looking for work." The term "unemployed" as used in the CPS includes persons who were looking for work in the reference week and those who were "on layoff" or "waiting to begin a new job in 30 days."

Layoff. In general, the work "layoff" means release from a job because of slack work, material shortages, inventory taking, plant remodeling, installation of machinery, or other similar reasons. For this survey, persons were also on "layoff" who did not have job but who responded that they has spent at least 1 week on layoff from a job and that they were available to accept a job.

In addition, persons were on "layoff" in a given month if they were 16 years old or over and (a) were "with a job" but "absent without pay" from that job for at least 1 full week during that month, and (b) they responded that their main reason for being absent from their job or business was "layoff." "On layoff" also includes a small number of persons who responded that they were waiting to report to a new wage and salary job that was to begin within 30 days. In other words, persons waiting to begin a new job are classified together with persons waiting to return to a job from which they have been laid off.

Full time and part time. The data on full- and part-time workers pertain to the number of hours a person usually worked per week during the weeks worked in the 4-month reference period of the survey. If the hours worked per week varied

Persons 16 years old and over who reported usually working 35 or more hours each week during the weeks they worked are classified as "full-time" workers; persons who reported that they usually worked fewer than 35 hours are classified as "part-time" workers. The same definitions are used in the CPS.

With labor force activity. The term "with labor force activity" includes all persons with a job (as defined above) and those looking for work or on layoff from a job for at least 1 week during a given month. Conversely, those persons "with no labor force activity" had no job, were not on layoff from a job and made no effort to find a job during the month.

**SURVEY OF INCOME AND PROGRAM PARTICIPATION (SIPP)**

**WAVE 6 RECTANGULAR MICRODATA FILE**

**TECHNICAL DOCUMENTATION**

**TECHNICAL INFORMATION**

## USER NOTES

This section will contain information relevant to SIPP that becomes available after the file is released. The cover letter to the updated information should be filed behind this page.

User Notes will be sent to all users who (1) purchased their file (or technical documentation) from the Census Bureau and (2) returned the coupon following the title page.

## ABSTRACT

Survey of Income and Program Participation  
(SIPP) Wave 6 Rectangular Microdata File [machine-  
readable data file] / conducted by the U.S. Bureau  
of the Census. --Washington: The Bureau [producer  
and distributor], 1986.

### TYPE OF FILE:

Microdata; unit of observation is an individual.

### UNIVERSE DESCRIPTION:

The universe is the resident population of the United States, but excluding persons living in institutions and military barracks.

### SUBJECT-MATTER DESCRIPTION:

The file contains basic demographic and social characteristics data for each member of the household. These include age, sex, race (White; Black; American Indian, Eskimo, and Aleut; Asian or Pacific Islander; and Other), ethnic origin (23 categories including 7 Spanish origin categories), marital status, household relationship, education, and veteran status.

Limited data are provided on housing unit characteristics such as units in structure, tenure, access, and complete kitchen facilities.

Core questions, which are repeated at each interview, cover labor force activity, types and amounts of income, and participation in various cash and noncash benefit programs for each month of the four-month reference period. Data for employed persons include number of hours and weeks worked, earnings, and weeks without a job. Nonworkers are classified as unemployed or not in the labor force. In addition to income data associated with labor force activity, data include nearly 50 other types of income. Core data also cover post secondary school attendance, public or subsidized rental housing, low-income energy assistance, and school breakfast and lunch participation.

Persons interviewed in Wave 6 were asked the core questions as well as questions on annual earnings and benefits, property income and taxes, and education and training. This file contains data only for the core questions. A later file will contain both core and topical module data.

The sample consists of 4 rotation groups, each interviewed in a different month from May to August 1985. For each group the reference period for reporting labor force activity and income is the four calendar months preceeding the interview month.

SIPP is a longitudinal survey where each sampled household and each descendent household is reinterviewed at 4-month intervals for 9 interviews or "waves." This file contains the results of the sixth interview. Unique

codes are included on each record to allow linking together the same persons with the preceding and subsequent waves.

#### GEOGRAPHIC COVERAGE:

United States. Codes are included for 38 individual States, although the sample was not designed to produce State estimates. Areas in the SIPP sample in six other States are identified in two groups for confidentiality reasons. Some cases are coded to other States not originally sampled, reflecting persons in the original sample who moved. The file identifies a subsample of metropolitan residents, along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's).

#### TECHNICAL DESCRIPTION:

**FILE STRUCTURE:** Rectangular. Each logical record for a sampled person includes information on the household and family of which the person was a part during each month of the reference period, as well as characteristics of the person and each source of income received during the period.

**FILE SIZE:** 45,007 logical records; 5,352 character logical record length.

#### FILE SORT SEQUENCE

**OF SAMPLE UNITS:** Rotation group (i.e., month of interview) by FIPS State of sampling unit within rotation group by sampling unit identification number within State by entry address ID and person number within sampling unit.

#### REFERENCE MATERIALS:

Survey of Income and Program Participation (SIPP) Wave 6 Rectangular Microdata File Technical Documentation. The documentation includes this abstract, the data dictionary, an index to the data dictionary, relevant code lists, a questionnaire facsimile, and general information relative to SIPP. One copy of the technical documentation accompanies each file order but also may be purchased separately for \$15 from Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233.

Survey of Income and Program Participation (SIPP) Users' Guide. The Users' Guide contains general information on the background, survey content, sample design, and procedures for estimation and calculation of sampling variability as well as a glossary of selected terms. The Users' Guide is not yet available.

Interviewers' Manual (1984). Survey of Income and Program Participation. U.S. Department of Commerce, Bureau of the Census. The Manual is available for \$10 from Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233.

#### RELATED PRINTED REPORTS:

See Appendix A--Bibliography in the General Information section of the technical documentation for information on products available from SIPP.

These products include working papers, compilations of papers presented at annual meetings of the American Statistical Association, articles appearing in the Journal of Economic and Social Measurement, and reports in the P-70 series of the Current Population Reports.

#### RELATED MACHINE-READABLE DATA FILES:

SIPP files are available from Data User Services Division, Customer Services, Washington, D.C. 20233. An order form is on the following page for your convenience.

A machine-readable data dictionary is available at the end of the last reel at either density or may be purchased separately on 1 reel for \$140.

#### FILE AVAILABILITY:

The file may be ordered from Data User Services Division using the order form on the following page. A machine-readable dictionary is contained at the end of reel 7 at 1600 bpi and reel 2 at 6250 bpi. It is also available separately for \$140 on 1 reel at either density.

## FILE INFORMATION

### Geographic Coverage

State codes are shown except for six States which are identified in two groups. A subsample of metropolitan residents is identified along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's). The sample was not designed to produce State or MSA/CMSA level estimates. State codes are primarily useful in relating a respondent's reciprocity of benefits to thresholds which may vary from State to State. MSA/CMSA codes may be used in relating respondent characteristics with contextual variables.

### Identification Number System

The SIPP identification scheme is designed to uniquely identify individuals in each wave, provide a means of linking the same individuals over time, and group individuals into households and families over time.

The various components of the identification scheme are listed below:

- Sample Unit Identification Number
- Address ID
- Entry Address ID
- Person Number

The sample unit identification number was created by scrambling together the PSU, segment, and serial number; used for Census Bureau administrative purposes. This identifier is constructed the same way on each wave regardless of moves, to enable matching from wave to wave.

The two-digit address ID code identifies each household associated with the same sample unit identification number. The first digit of the address ID code indicates the wave in which that address was first assigned for interview. The second digit sequentially numbers multiple households that have the same serial number. The address ID code is 11 for all sample addresses, that are the same as in Wave 1. As SIPP sample persons move to new addresses, new address ID codes are assigned. Any new address to which sample unit members moved during Wave 4 is numbered in the 40's.

The person ID is a five-digit number consisting of the two-digit entry address ID and a three-digit person number. Person numbers 101, 102, etc., are assigned in Wave 1; 201, 202, etc., are assigned to persons added to the roster in Wave 2, and so forth. This five-digit number is not changed or updated, regardless of moves.

The sampling unit serial number and address ID code uniquely identifies each household in any given wave. The sampling unit serial number can link all households in subsequent waves back to the original Wave 1 household.

### Topcoding of Income Variables

To protect against the possibility that a user might recognize the identity of a SIPP respondent with very high income, income from every source is "topcoded" so

that no individual income amounts above \$100,000 are revealed. While the data dictionary indicates a topcode of \$33,332 for monthly income, this topcode will rarely be used. In most cases the monthly income is shown as individual dollar amounts of \$8,333, with \$8,333 actually representing "\$8,333 or more." (The \$100,000 income topcode is \$8,333 multiplied by 12 months). Individual monthly amounts above \$8,333 may occasionally be shown if the respondent's income varied considerably from month to month, as long as the average does not exceed \$8,333. For example, if a respondents' income from a single job were concentrated in only one of the four reference months, a figure as high as \$33,332 could be shown. (Income from interest or property have lower topcodes).

Summary income figures on the person, family, and household records are simple sums of the components shown on the file after topcoding, and are not independently topcoded. Thus, a person with high income from several sources (jobs, businesses, property) could have aggregate monthly income well over the topcode for each source. Families and households with a number of high income members could theoretically have aggregate income shown well over \$100,000, through well below the \$1.5 million shown as the highest allowable value in the data dictionary.

The user is cautioned against trying to make much use of the occasional monthly figures above \$8,333, except in calculating aggregates or observing patterns across the 4-month period for a single individual, family, or household. Those units with higher monthly amounts shown are a biased sample of high income units, more likely to include units with income from multiple sources than other units with equally high aggregate income which comes from a single source.

## INDEX TO SIPP RECTANGULAR CORE FILE

This is an index to the data dictionary for the 1984 panel SIPP rectangular core files, Waves 2 to 9. Wave 1 has a slightly different layout, with corresponding items in the same sequence but not exactly the same locations--see Appendix C "Comparison of Item Locations on Wave 1 and Later Waves."

The five columns at the right present the beginning character location for the referenced data field or fields. Entries in the four righthand columns refer to data specific to particular months during the reference period. For example, data in the column headed "MO 1 LOCATION" refer to the first reference months (four months prior to the interview). Entries in the column headed "INTV LOCATION" refer to characteristics as of the interview date, e.g., the highest grade attended, or other items not differentiated by month during the reference period. Where the entry refers to more than one consecutive data field, the location is that of the first character of the first field.

The column headed "MNEMONIC" presents the same 8-character data names as are shown in the data dictionary, with two exceptions. Where there are separate entries for the four reference months, an asterisk (\*) replaces the 1, 2, 3, or 4 that would appear in the actual mnemonic. (Where there is an entry in the "INTV LOCATION" column as well as the four months, the data item refers to the same characteristic as of the interview date, and would carry a 5 in place of the asterisk in the mnemonic.) Where a colon appears in the mnemonic, as in SC1660:78, the index entry applies to two or more consecutive fields, in this case starting with SC1660 and ending with SC1678.

This index may also be used as an index to the questionnaire document itself, reproduced in the Users' Guide text. Each item on the questionnaire carries a boxed 4-digit number next to the answer fields. This number appears as part of the mnemonic wherever the correspondence between the item on tape and the questionnaire item is direct. The 4-digit number is usually preceded by "SC", but when other characters appear they add meaning. For example, WS1-2012 corresponds to questionnaire item 2012 (on class of worker) and the "WS1" distinguishes the response for the first wage/salary job from a response for the second such job, which would begin with "WS2". Mnemonics without 4-digit numbers are associated with items from the control card or are the result of manipulating or "recoding" one or more items from the questionnaire.

## HOW TO USE THE DATA DICTIONARY

The Data Dictionary describes the contents and record layout of the public-use computer tape file. The first line of each data item description gives the data name, size of the data field, and the begin position of the field. The term TABLE may follow if the data item contains data dimensioned in an array (i.e. - 6 cells of 3-characters each; 18 total characters for the field).

The next few lines contain descriptive text and any applicable notes. Categorical value codes and labels are given where needed. Comment notes marked by an (\*) are provided throughout. Comments should be removed from the machine-readable version of the data dictionary before using it to help access the data file.

**DATA.** 8 characters--alphabetic, numeric, and the special character (-). No other special characters are used. It may be a mnemonic such as "H1-STATE" or "SE-OCC", or a sequential identifier such as "SC3138" or "WS-IMP01." Data item names are unique throughout the entire file.

**SIZE.** 9 characters--numeric. The size of a data item is given in characters. Indication of implied decimal places is provided in notes.

**BEGIN.** 9 characters--numeric. Contains the location in the data record of the first character position of the data item field.

The first line of the data item description begins with the character "D" (left-justified, two characters). The "D" flag indicates lines in the data dictionary containing the name and location (size and begin) position of each data item. This information (in machine-readable form) can be used to help access the data file. The line beginning with the character "U" describes the universe for that item. Lines containing categorical value codes and labels follow the universe description and begin with the character "V". The special character (.) denotes the start of the value labels. Two examples of data item descriptions follow:

```

D WS1-2030      1      3297
    During the 4-month period how often
    was...paid on the job ?
U Persons 15 years old and older
V 0 .Not in universe
  1 .Once a week
  2 .Once each 2 weeks
  3 .Once a month
  4 .Twice a month
  5 .Some other way

D WEEKSLK      18      2525  TABLE
    Was this person looking for work
    or on layoff during this week of the
    reference period. There are 18 answer
    fields, one for each week of the
    reference period.
U Persons 15 years old or old
V 0 .Not applicable
  1 .Yes
  2 .No

```

## SAMPLE UNIT

composition. Interview date.

Range = 1,5

U All persons, including children

D FCHANGE1           1       2225

Used to determine if the family (or pseudo family) changed in composition from one month to the next.

These fields only relate to primary and unrelated secondary families and to primary and secondary individuals. To determine change in related subfamilies see 'S-CHANGE' below. The values of the fields for the respective months are determined in the same manner as for 'H-CHANGE' above. Month 1. Range = 1

U All persons, including children

D FCHANGE2           1       2226

Used to determine if the family (or pseudo family) changed in composition. Month 2. Range = 1,2

U All persons, including children

D FCHANGE3           1       2227

Used to determine if the family (or pseudo family) changed in composition. Month 3. Range = 1,3

U All persons, including children

D FCHANGE4           1       2228

Used to determine if the family (or pseudo family) changed in composition. Month 4. Range = 1,4

U All persons, including children

D SCHANGE1           1       2229

Used to determine if the related subfamily which includes this person, changed composition from month to month. If, during any month, the person is not a member of a related subfamily, the value of the field for the corresponding month is '0'. For members of subfamilies the values in the fields are derived as in 'H-CHANGE' above. Month 1. Range = 1

U All persons, including children

 State Administered Supplemental Security Income  
 State unemployment compensation  
 Supplemental Unemployment Benefits  
 Other unemployment compensation (Trade Adjustment Act benefits; strike pay, other)  
 Veterans compensation or pensions  
 Black lung payments  
 Worker's compensation  
 State temporary sickness or disability benefits  
 Payments from a sickness, accident or disability insurance policy purchased on your own  
 Aid to Families with Dependent Children (AFDC, ADC)  
 General assistance or General relief  
 Indian, Cuban, or Refugee Assistance  
 Foster child care payments  
 Other welfare  
 Child support payments  
 Alimony payments  
 Pension from company or union  
 Federal Civil Service or other Federal civilian employee pensions

**Other Income Sources (Continued)**

U.S. Military retirement pay  
National Guard or Reserve Forces retirement  
State government pensions  
Local government pensions  
Income from paid-up life insurance policies or annuities  
Estates and trusts  
Other payments for retirement, disability or survivor  
G.I. Bill/VEAP education benefits  
Income assistance from a charitable group  
Money from relatives or friends  
Lump sum payments  
Income from roomers or boarders  
National Guard or Reserve pay  
Incidental or casual earnings  
Other cash income not included elsewhere

## APPENDIX A-3.

## SOURCES OF MEANS-TESTED BENEFITS COVERED IN SIPP

Cash Benefits

Federal Supplemental Security Income (SSI)  
State Administered Supplemental Security Income  
Veterans' pensions  
Aid to Families with Dependent Children (AFDC, ADC)  
General Assistance or General Relief  
Indian, Cuban, or Refugee Assistance  
Other welfare  
Foster child care payments

Noncash Benefits

Food Stamps  
Special Supplemental Food Program for Women,  
Infants, and Children (WIC)  
Low-Income Home Energy Assistance

## Medicaid

Free or reduced price school lunches  
Free or reduced price school breakfasts  
Public or subsidized rental housing

## APPENDIX A-4

**1980 CENSUS OF POPULATION  
OCCUPATION CLASSIFICATION SYSTEM**

(The numbers in parentheses refer to the 1980 Standard Occupational Classification code equivalents. Pt means part. N.e.c. means not elsewhere classified.)

**MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS**

1980

CODE

**Executive, Administrative, and Managerial Occupations**

003 Legislators (111)  
 004 Chief executives and general administrators, public administration (112)  
 005 Administrators and officials, public administration (1132-1139)  
 006 Administrators, protective services (1131)  
 007 Financial managers (122)  
 008 Personnel and labor relations managers (123)  
 009 Purchasing managers (124)  
 013 Managers, marketing, advertising, and public relations (125)  
 014 Administrators, education and related fields (128)  
 015 Managers, medicine and health (131)  
 016 Managers, properties and real estate (1353)  
 017 Postmasters and mail superintendents (1344)  
 018 Funeral directors (pt 1359)  
 019 Managers and administrators, n.e.c. (121, 126, 127, 132-139, exc. 1344, 1353, pt 1359)

**Management Related Occupations**

023 Accountants and auditors (1412)  
 024 Underwriters (1414)  
 025 Other financial officers (1415, 1419)  
 026 Management analysts (142)  
 027 Personnel, training, and labor relations specialists (143)  
 028 Purchasing agents and buyers, farm products (1443)  
 029 Buyers, wholesale and retail trade except farm products (1442)  
 033 Purchasing agents and buyers, n.e.c. (1449)  
 034 Business and promotion agents (145)  
 035 Construction inspectors (1472)  
 036 Inspectors and compliance officers, exc. construction (1473)  
 037 Management related occupations, n.e.c. (149)

**Professional Specialty Occupations**

**Engineers, Architects, and Surveyors**

043 Architects (161)  
 044 Engineers  
     Aerospace (1622)  
 Engineers, Architects, and Surveyors (continued)  
     Engineers (continued)  
 045 Metallurgical and materials (1623)

|     |  |
|-----|--|
| 046 | Mining (1624)  |
| 047 | Petroleum (1625)   |
| 048 | Chemical (1626)  |
| 049 | Nuclear (1627)   |
| 053 | Civil (1628)   |

| 199 | Athletes (34)  |

#### TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS

##### Technicians and Related Support Occupations

##### Health Technologists and Technicians

|     |   |
|-----|---|
| 203 | Clinical laboratory technologists and technicians (362) |
| 204 | Dental hygienists (363)                                 |
| 205 | Health record technologists and technicians (364)       |
| 206 | Radiologic technicians (365)                            |
| 207 | Licensed practical nurses (366)                         |
| 208 | Health technologists and technicians, n.e.c. (369)      |

##### Technologists and Technicians, Except Health

##### Engineering and Related Technologists and Technicians

|     |  |
|-----|--|
| 213 | Electrical and electronic technicians (3711) |
| 214 | Industrial engineering technicians (3712)    |
| 215 | Mechanical engineering technicians (3713)    |
| 216 | Engineering technicians, n.e.c. (3719)       |
| 217 | Drafting occupations (372)                   |
| 218 | Surveying and mapping technicians (373)      |

##### Science Technicians

|     |  |
|-----|--|
| 223 | Biological technicians (382)                       |
| 224 | Chemical technicians (3831)                        |
| 225 | Science technicians, n.e.c. (3832, 3833, 384, 389) |

##### Technicians, Except Health, Engineering, and Science

|     |  |
|-----|--|
| 226 | Airplane pilots and navigators (825)       |
| 227 | Air traffic controllers (392)              |
| 228 | Broadcast equipment operators (393)        |
| 229 | Computer programmers (3971, 3972)          |
| 233 | Tool programmers, numerical control (3974) |
| 234 | Legal assistants (396)                     |
| 235 | Technicians, n.e.c. (399)                  |

##### Sales Occupations

|     |   |
|-----|---|
| 243 | Supervisors and proprietors, sales occupations (40) |
|-----|---|

##### Sales Representatives, Finance and Business Services

|     |  |
|-----|--|
| 253 | Insurance sales occupations (4122)                         |
| 254 | Real estate sales occupations (4123)                       |
| 255 | Securities and financial services sales occupations (4124) |
| 256 | Advertising and related sales occupations (4153)           |
| 257 | Sales occupations, other business services (4152)          |

Sales Representatives, Commodities Except Retail  
 258 Sales engineers (421)  
 259 Sales representatives, mining, manufacturing, and wholesale (423, 424)

Sales Workers, Retail and Personal Services  
 263 Sales workers, motor vehicles and boats (4342, 4344)  
 264 Sales workers, apparel (4346)  
 265 Sales workers, shoes (4351)  
 266 Sales workers, furniture and home furnishings (4348)  
 267 Sales workers; radio, TV, hi-fi, and appliances (4343, 4352)  
 268 Sales workers, hardware and building supplies (4353)  
 269 Sales workers, parts (4367)  
 274 Sales workers, other commodities (4345, 4347, 4354, 4356, 4359, 4362, 4369)  
 275 Sales counter clerks (4363)  
 Q(276) Cashiers (4364)  
 277 Street and door-to-door sales workers (4366)  
 278 News vendors (4365)

Sales Related Occupations  
 283 Demonstrators, promoters and models, sales (445)  
 284 Auctioneers (447)  
 285 Sales support occupations, n.e.c. (444, 446, 449)

Administrative Support Occupations, Including Clerical  
 Supervisors, Administrative Support Occupations  
 303 Supervisors, general office (4511, 4513, 4514, 4516, 4519, 4529)  
 304 Supervisors, computer equipment operators (4512)  
 305 Supervisors, financial records processing (4521)  
 306 Chief communications operators (4523)  
 307 Supervisors; distribution, scheduling, and adjusting clerks (4522, 4524-4528)

Computer Equipment Operators  
 308 Computer operators (4612)  
 309 Peripheral equipment operators (4613)

Secretaries, Stenographers, and Typists  
 R(313) Secretaries (4622)  
 314 Stenographers (4623)  
 315 Typists (4624)

Information Clerks  
 316 Interviewers (4642)  
 317 Hotel clerks (4643)  
 318 Transportation ticket and reservation agents (4644)  
 319 Receptionists (4645)  
 323 Information clerks, n.e.c. (4649)

Records Processing Occupations, Except Financial  
 325 Classified-ad clerks (4662)  
 326 Correspondence clerks (4663)  
 327 Order clerks (4664)  
 328 Personnel clerks, except payroll and timekeeping (4692)  
 329 Library clerks (4694)  
 335 File clerks (4696)  
 336 Records clerks (4699)

Financial Records Processing Occupations  
 S(337) Bookkeepers, accounting, and auditing clerks (4712)

338 Payroll and timekeeping clerks (4713)  
 339 Billing clerks (4715)  
 343 Cost and rate clerks (4716)  
 344 Billing, posting, and calculating machine operators (4718)

**Duplicating, Mail and Other Office Machine Operators**

345 Duplicating machine operators (4722)  
 346 Mail preparing and paper handling machine operators (4723)  
 347 Office machine operators, n.e.c. (4729)

**Communications Equipment Operators**

348 Telephone operators (4732)  
 349 Telegraphers (4733)  
 353 Communications equipment operators, n.e.c. (4739)

**Mail and Message Distributing Occupations**

354 Postal clerks, exc. mail carriers (4742)  
 355 Mail carriers, postal service (4743)  
 356 Mail clerks, exc. postal service (4744)  
 357 Messengers (4745)

**Material Recording, Scheduling, and Distributing Clerks**

359 Dispatchers (4751)  
 363 Production coordinators (4752)  
 364 Traffic, shipping, and receiving clerks (4753)  
 365 Stock and inventory clerks (4754)  
 366 Meter readers (4755)  
 368 Weighers, measurers, and checkers (4756)  
 369 Samplers (4757)  
 373 Expeditors (4758)  
 374 Material recording, scheduling, and distributing clerks, n.e.c. (4759)

**Adjusters and Investigators**

375 Insurance adjusters, examiners, and investigators (4782)  
 376 Investigators and adjusters, except insurance (4783)  
 377 Eligibility clerks, social welfare (4784)  
 378 Bill and account collectors (4786)

**Miscellaneous Administrative Support Occupations**

379 General office clerks (463)  
 383 Bank tellers (4791)  
 384 Proofreaders (4792)  
 385 Data-entry keyers (4793)  
 386 Statistical clerks (4794)  
 387 Teachers' aides (4795)  
 389 Administrative support occupations, n.e.c. (4787, 4799)

**SERVICE OCCUPATIONS**

**Private Household Occupations**

403 Launderers and ironers (503)  
 404 Cooks, private household (504)  
 405 Housekeepers and butlers (505)  
 406 Child care workers, private household (506)  
 T(407) Private household cleaners and servants (502, 507, 509)

**Protective Service Occupations**

Supervisors, Protective Service Occupations

|        |  |
|--------|--|
| 413    | Supervisors, firefighting and fire prevention occupations (5111)   |
| 414    | Supervisors, police and detectives (5112)                          |
| 415    | Supervisors, guards (5113)   |
|        | <b>Firefighting and Fire Prevention Occupations</b>                |
| 416    | Fire inspection and fire prevention occupations (5122)             |
| 417    | Firefighting occupations (5123)                                    |
|        | <b>Police and Detectives</b>                                       |
| 418    | Police and detectives, public service (5132)                       |
| 423    | Sheriffs bailiffs, and other law enforcement officers (5134)       |
| 424    | Correctional institution officers (5133)                           |
|        | <b>Guards</b>  |
| 425    | Crossing guards (5142)   |
| 426    | Guards and police, exc. public service (5144)                      |
| 427    | Protective service occupations, n.e.c. (5149)                      |
|        | <b>Service Occupations, Except Protective and Household</b>        |
|        | <b>Food Preparation and Service Occupations</b>                    |
| 433    | Supervisors, food preparation and service occupations (5211)       |
| 434    | Bartenders (5212)  |
| U(435) | Waiters and waitresses (5213)                                      |
| 436    | Cooks, except short order (5214)                                   |
| 437    | Short-order cooks (5215)   |
| 438    | Food counter, fountain and related occupations (5216)              |
| 439    | Kitchen workers, food preparation (5217)                           |
| 443    | Waiters'/waitresses' assistants (5218)                             |
| 444    | Miscellaneous food preparation occupations (5219)                  |
|        | <b>Health Service Occupations</b>                                  |
| 445    | Dental assistants (5232)   |
| 446    | Health aides, except nursing (5233)                                |
| 447    | Nursing aides, orderlies, and attendants (5236)                    |
|        | <b>Cleaning and Building Service Occupations, except Household</b> |
| 448    | Supervisors, cleaning and building service workers (5241)          |
| 449    | Maids and housemen (5242, 5249)                                    |
| V(453) | Janitors and cleaners (5244)                                       |
| 454    | Elevator operators (5245)  |
| 455    | Pest control occupations (5246)                                    |
|        | <b>Personal Service Occupations</b>                                |
| 456    | Supervisors, personal service occupations (5251)                   |
| 457    | Barbers (5252)   |
| 458    | Hairdressers and cosmetologists (5253)                             |
|        | <b>Personal Service Occupations (continued)</b>                    |
| 459    | Attendants, amusement and recreation facilities (5254)             |
| 463    | Guides (5255)  |
| 464    | Ushers (5256)  |
| 465    | Public transportation attendants (5257)                            |
| 466    | Baggage porters and bellhops (5262)                                |
| 467    | Welfare service aides (5263)                                       |
| 468    | Child care workers, except private household (5264)                |
| 469    | Personal service occupations, n.e.c. (5258, 5269)                  |

# **FARMING, FORESTRY, AND FISHING OCCUPATIONS**

|        |  |
|--------|--|
|        | <b>Farm Operators and Managers</b>                     |
| W(473) | Farmers, except horticultural (5512-5514)              |
| 474    | Horticultural specialty farmers (5515)                 |
| 475    | Managers, farms, except horticultural (5522-5524)      |
| 476    | Managers, horticultural specialty farms (5525)         |
|        | <b>Other Agricultural and Related Occupations</b>      |
|        | <b>Farm Occupations, Except Managerial</b>             |
| 477    | Supervisors, farm workers (5611)                       |
| 479    | Farm workers (5612-5617)                               |
| 483    | Marine life cultivation workers (5618)                 |
| 484    | Nursery workers (5619)                                 |
|        | <b>Related Agricultural Occupations</b>                |
| 485    | Supervisors, related agricultural occupations (5621)   |
| 486    | Groundskeepers and gardeners, except farm (5622)       |
| 487    | Animal caretakers, except farm (5624)                  |
| 488    | Graders and sorters, agricultural products (5625)      |
| 489    | Inspectors, agricultural products (5627)               |
|        | <b>Forestry and Logging Occupations</b>                |
| 494    | Supervisors, forestry, and logging workers (571)       |
| 495    | Forestry workers, except logging (572)                 |
| 496    | Timber cutting and logging occupations (573, 579)      |
|        | <b>Fishers, Hunters, and Trappers</b>                  |
| 497    | Captains and other officers, fishing vessels (pt 8241) |
| 498    | Fishers (583)  |
| 499    | Hunters and trappers (584)                             |

#### **PRECISION PRODUCTION, CRAFT, AND REPAIR OCCUPATIONS**

|        |   |
|--------|---|
|        | <b>Mechanics and Repairers</b>                              |
| 503    | Supervisors, mechanics and repairers (60)                   |
|        | <b>Mechanics and Repairers, Except Supervisors</b>          |
|        | <b>Vehicle and Mobile Equipment Mechanics and Repairers</b> |
| X(505) | Automobile mechanics (pt 6111)                              |
| 506    | Automobile mechanic apprentices (pt 6111)                   |
| 507    | Bus, truck, and stationary engine mechanics (6112)          |
| 508    | Aircraft engine mechanics (6113)                            |
| 509    | Small engine repairers (6114)                               |
| 514    | Automobile body and related repairers (6115)                |
| 515    | Aircraft mechanics, exc. engine (6116)                      |
| 516    | Heavy equipment mechanics (6117)                            |
| 517    | Farm equipment mechanics (6118)                             |

#### **Mechanics and Repairers Except Supervisors (continued)**

|     |   |
|-----|---|
| 518 | Industrial machinery repairers (613)  |
| 519 | Machinery maintenance occupations (614)   |
|     | <b>Electrical and Electronic Equipment Repairers</b>                                |
| 523 | Electronic repairers, communications and industrial equipment<br>(6151, 6153, 6155) |
| 525 | Data processing equipment repairers (6154)  |
| 526 | Household appliance and power tool repairers (6156)                                 |
| 527 | Telephone line installers and repairers (6157)                                      |

529 Telephone installers and repairers (6158)  
 533 Miscellaneous electrical and electronic equipment repairers (6152, 61  
 534 Heating, air conditioning, and refrigeration mechanics (6161  
 Miscellaneous Mechanics and Repairers  
 535 Camera, watch, and musical instrument repairers (6171, 6172)  
 536 Locksmiths and safe repairers (6173)  
 538 Office machine repairers (6174)  
 539 Mechanical controls and valve repairers (6175)  
 543 Elevator installers and repairers (6176)  
 544 Millwrights (6178)  
 547 Specified mechanics and repairers, n.e.c. (6177, 6179)  
 549 Not specified mechanics and repairers

#### Construction Trades

##### Supervisors, construction occupations

553 Supervisors; brickmasons, stonemasons, and tile setters (6312)  
 554 Supervisors, carpenters and related workers (6313)  
 555 Supervisors, electricians and power transmission installers (6314)  
 556 Supervisors; painters, paperhangers, and plasterers (6315)  
 557 Supervisors; plumbers, pipefitters, and steamfitters (6316)  
 558 Supervisors, n.e.c. (6311, 6318)

##### Construction Trades, Except Supervisors

563 Brickmasons and stonemasons (pt 6412, pt 6413)  
 564 Brickmason and stonemason apprentices (pt 6412, pt 6413)  
 565 Tile setters, hard and soft (6414, pt 6462)  
 566 Carpet installers (pt 6462)  
 Y(567) Carpenters (pt 6422)  
 569 Carpenter apprentices (pt 6422)  
 573 Drywall installers (6424)  
 575 Electricians (pt 6432)  
 576 11 Electrician apprentices (pt 6432)  
 577 Electrical power installers and repairers (6433)  
 579 Painters, construction and maintenance (6442)  
 583 Paperhangers (6443)  
 584 Plasterers (6444)  
 585 Plumbers, pipefitters, and steamfitters (pt 645)  
 587 Plumber, pipefitter, and steamfitter apprentices (pt 645)  
 588 Concrete and terrazzo finishers (6463)  
 589 Glaziers (6464)  
 593 Insulation workers (6465)  
 594 Paving, surfacing, and tamping equipment operators (6466)  
 595 Roofers (6468)  
 596 Sheetmetal duct installers (6472)  
 597 Structural metal workers (6473)  
 598 Drillers, earth (6474)  
 599 Construction trades, n.e.c. (6467, 6475, 6476, 6479)

#### Extractive Occupations

613 Supervisors, extractive occupations (632)  
 614 Drillers, oil well (652)  
 615 Explosives workers (653)  
 616 Mining machine operators (654)  
 617 Mining occupations, n.e.c. (656)

#### Precision Production Occupations

633 Supervisors, production occupations (67, 71)

|     |  |
|-----|--|
|     | <b>Precision Metal Working Occupations</b>                         |
| 634 | Tool and die makers (pt 6811)                                      |
| 635 | Tool and die maker apprentices (pt 6811)                           |
| 636 | Precision assemblers, metal (6812)                                 |
| 637 | Machinists (pt 6813)   |
| 639 | Machinist apprentices (pt 6813)                                    |
| 643 | Boilermakers (6814)  |
| 644 | Precision grinders, filers, and tool sharpeners (6816)             |
| 645 | Patternmakers and model makers, metal (6817)                       |
| 646 | Lay-out workers (6821)   |
| 647 | Precious stones and metals workers (Jewelers) (6822, 6866)         |
| 649 | Engravers, metal (6823)  |
| 653 | Sheet metal workers (pt 6824)                                      |
| 654 | Sheet metal worker apprentices (pt 6824)                           |
| 655 | Miscellaneous precision metal workers (6829)                       |
|     | <b>Precision Woodworking Occupations</b>                           |
| 656 | Patternmakers and model makers, wood (6831)                        |
| 657 | Cabinet makers and bench carpenters (6832)                         |
| 658 | Furniture and wood finishers (6835)                                |
| 659 | Miscellaneous precision woodworkers (6839)                         |
|     | <b>Precision Textile, Apparel, and Furnishings Machine Workers</b> |
| 666 | Dressmakers (pt 6852, pt 7752)                                     |
| 667 | Tailors (pt 6852)  |
| 668 | Upholsterers (6853)  |
| 669 | Shoe repairers (6854)  |
| 673 | Apparel and fabric patternmakers (6856)                            |
| 674 | Miscellaneous precision apparel and fabric workers (6859, pt 7752) |
|     | <b>Precision Workers, Assorted Materials</b>                       |
| 675 | Hand molders and shapers, except jewelers (6861)                   |
| 676 | Patternmakers, lay-out workers, and cutters (6862)                 |
| 677 | Optical goods workers (6864, pt 7477, pt 7677)                     |
| 678 | Dental laboratory and medical appliance technicians (6865)         |
| 679 | Bookbinders (6844)   |
| 683 | Electrical and electronic equipment assemblers (6867)              |
| 684 | Miscellaneous precision workers, n.e.c. (6869)                     |
|     | <b>Precision Food Production Occupations</b>                       |
| 686 | Butchers and meat cutters (6871)                                   |
| 687 | Bakers (6872)  |
| 688 | Food batchmakers (6873, 6879)                                      |
|     | <b>Precision Inspectors, Testers, and Related Workers</b>          |
| 689 | Inspectors, testers, and graders (6881, 828)                       |
| 693 | Adjusters and calibrators (6882)                                   |
|     | <b>Plant and System Operators</b>                                  |
| 694 | Water and sewage treatment plant operators (691)                   |
| 695 | Power plant operators (pt 693)                                     |
| 696 | Stationary engineers (pt 693, 7666)                                |
| 699 | Miscellaneous plant and system operators (692, 694, 695, 696)      |

#### **OPERATORS, FABRICATORS, AND LABORERS**

|     |  |
|-----|--|
|     | <b>Machine Operators, Assemblers, and Inspectors</b>       |
|     | <b>Machine Operators and Tenders, except Precision</b>     |
|     | <b>Metal working and Plastic Working Machine Operators</b> |
| 703 | Lathe and turning machine set-up operators (7312)          |
| 704 | Lathe and turning machine operators (7512)                 |

- 705 Milling and planing machine operators (7313, 7513)  
 706 Punching and stamping press machine operators (7314, 7317, 7514, 7517)  
 707 Rolling machine operators (7316, 7516)  
 708 Drilling and boring machine operators (7318, 7518)  
 709 Grinding, abrading, buffing, and polishing machine operators  
 (7322, 7324, 7522)  
 713 Forging machine operators (7319, 7519)  
 714 Numerical control machine operators (7326)  
 715 Miscellaneous metal, plastic, stone, and glass working machine operators  
 (7329, 7529)  
 717 Fabricating machine operators, n.e.c. (7339, 7539)  
**Metal and Plastic Processing Machine Operators**  
 719 Molding and casting machine operators (7315, 7342, 7515, 7542)  
 723 Metal plating machine operators (7343, 7543)  
 724 Heat treating equipment operators (7344, 7544)  
 725 Miscellaneous metal and plastic processing machine operators (7349, 7549)  
**Woodworking Machine Operators**  
 726 Wood lathe, routing, and planing machine operators (7431, 7432, 7631, 7632)  
 727 Sawing machine operators (7433, 7633)  
 728 Shaping and joining machine operators (7435, 7635)  
 729 Nailing and tacking machine operators (7636)  
 733 Miscellaneous woodworking machine operators (7434, 7439, 7634, 7639)  
**Printing Machine Operators**  
 734 Printing machine operators (7443, 7643)  
 735 Photoengravers and lithographers (6842, 7444, 7644)  
 736 Typesetters and compositors (6841, 7642)  
 737 Miscellaneous printing machine operators (6849, 7449, 7649)  
  
**Textile, Apparel, and Furnishings Machine Operators**  
 738 Winding and twisting machine operators (7451, 7651)  
 739 Knitting, looping, taping, and weaving machine operators (7452, 7652)  
 743 Textile cutting machine operators (7654)  
 744 Textile sewing machine operators (7655)  
 745 Shoe machine operators (7656)  
 747 Pressing machine operators (7657)  
 748 Laundering and dry cleaning machine operators (6855, 7658)  
 749 Miscellaneous textile machine operators (7459, 7659)  
  
**Machine Operators, Assorted Materials**  
 753 Cementing and gluing machine operators (7661)  
 754 Packaging and filling machine operators (7462, 7662)  
 755 Extruding and forming machine operators (7463, 7663)  
 756 Mixing and blending machine operators (7664)  
 757 Separating, filtering, and clarifying machine operators  
 (7476, 7666, 7676)  
 758 Compressing and compacting machine operators (7467, 7667)  
 759 Painting and paint spraying machine operators (7669)  
  
**Machine Operators, Assorted Materials (continued)**  
 763 Roasting and baking machine operators, food (7472, 7672)  
 764 Washing, cleaning, and pickling machine operators (7673)  
 765 Folding machine operators (7474, 7674)  
 766 Furnace, kiln, and oven operators, exc. food (7675)  
 768 Crushing and grinding machine operators (pt 7477, pt 7677)  
 769 Slicing and cutting machine operators (7478, 7678)

773 Motion picture projectionists (pt 7479)  
 774 Photographic process machine operators (6863, 6868, 7671)  
 777 Miscellaneous machine operators, n.e.c. (pt 7479, 7665, 7679)  
 779 Machine operators, not specified

**Fabricators, Assemblers, and Hand Working Occupations**

783 Welders and cutters (7332, 7532, 7714)  
 784 Solderers and brazers (7333, 7533, 7717)  
 785 Assemblers (772, 774)  
 786 Hand cutting and trimming occupations (7753)  
 787 Hand molding, casting, and forming occupations (7754, 7755)  
 789 Hand painting, coating, and decorating occupations (7756)  
 793 Hand engraving and printing occupations (7757)  
 794 Hand grinding and polishing occupations (7758)  
 795 Miscellaneous hand working occupations (7759)  
**Production Inspectors, Testers, Samplers, and Weighers**  
 796 Production inspectors, checkers, and examiners (782, 787)  
 797 Production testers (783)  
 798 Production samplers and weighers (784)  
 799 Graders and sorters, exc. agricultural (785)

**Transportation and Material Moving Occupations**

**Motor Vehicle Operators**

803 Supervisors, motor vehicle operators (8111)  
 804) Truck drivers, heavy (8212, 8213)  
 805 Truck drivers, light (8214)  
 806 Driver-sales workers (8218)  
 808 Bus drivers (8215)  
 809 Taxicab drivers and chauffeurs (8216)  
 813 Parking lot attendants (874)  
 814 Motor transportation occupations, n.e.c. (8219)

**Transportation Occupations, Except Motor Vehicles**

**Rail Transportation Occupations**

823 Railroad conductors and yardmasters (8113)  
 824 Locomotive operating occupations (8232)  
 825 Railroad brake, signal, and switch operators (8233)  
 826 Rail vehicle operators, n.e.c. (8239)

**Water Transportation Occupations**

828 Ship captains and mates, except fishing boats (pt 8241, 8242)  
 829 Sailors and deckhands (8243)  
 833 Marine engineers (8244)  
 834 Bridge, lock, and lighthouse tenders (8245)

**Material Moving Equipment Operators**

843 Supervisors, material moving equipment operators (812)  
 844 Operating engineers (8312)  
 845 Longshore equipment operators (8313)

**Material Moving Equipment Operators (continued)**

848 Hoist and winch operators (8314)  
 849 Crane and tower operators (8315)  
 853 Excavating and loading machine operators (8316)  
 855 Grader, dozer, and scraper operators (8317)  
 856 Industrial truck and tractor equipment operators (8318)  
 859 Miscellaneous material moving equipment operators (8319)

Handlers, Equipment Cleaners, Helpers, and Laborers  
863 Supervisors, handlers, equipment cleaners, and laborers, n.e.c. (85)  
864 Helpers, mechanics and repairers (863)  
Helpers, Construction and Extractive Occupations  
865 Helpers, construction trades (8641-8645, 8646)  
866 Helpers, surveyor (8646)  
867 Helpers, extractive occupations (865)  
869 Construction laborers (871)  
873 Production helpers (861, 862)  
Freight, Stock, and Material Handlers  
875 Garbage collectors (8722)  
876 Stevedores (8723)  
877 Stock handlers and baggers (8724)  
878 Machine feeders and offbearers (8725)  
883 Freight, stock, and material handlers, n.e.c. (8726)  
885 Garage and service station related occupations (873)  
887 Vehicle washers and equipment cleaners (875)  
888 Hand packers and packagers (8761)  
889 Laborers, except construction (8769)  
  
905 Member of the Armed Forces

## APPENDIX A-5

1980 CENSUS OF POPULATION  
INDUSTRY CLASSIFICATION SYSTEM(Numbers in parentheses are the 1972 SIC code equivalents 1/)Census  
Code

## AGRICULTURE, FORESTRY, AND FISHERIES

010 (A)      Agricultural production, crops (01)  
 011          Agricultural production, livestock (02)  
 020          Agricultural services, except horticultural (07, except 078)  
 021          Horticultural services (078)  
 030          Forestry (08)  
 031          Fishing, hunting, and trapping (09)

## MINING

040          Metal mining (10)  
 041          Coal mining (11, 12)  
 042          Crude petroleum and natural gas extraction (13)  
 050          Nonmetallic mining and quarrying, except fuel (14)

060 (B)          CONSTRUCTION (15, 16, 17)

## MANUFACTURING

Nondurable Goods

Food and kindred products  
 100          Meat products (201)  
 101          Dairy products (202)  
 102          Canned and preserved fruits and vegetables (203)  
 110          Grain mill products (204)  
 111          Bakery products (205)  
 112          Sugar and confectionery products (206)  
 120          Beverage industries (208)  
 121          Miscellaneous food preparations and kindred products (207, 209)  
 122          Not specified food industries  
 130          Tobacco manufactures (21)  
 Textile mill products  
 132          Knitting mills (225)  
 140          Dyeing and finishing textiles, except wool and knit goods (226)  
 141          Floor coverings, except hard surface (227)  
 142          Yarn, thread, and fabric mills (221-224, 228)  
 150          Miscellaneous textile mill products (229)

| 172     | Printing, publishing, and allied industries, except newspapers (272-279) |
|         | Chemicals and allied products  |
| 180     | Plastics, synthetics, and resins (282)                                   |
| 181     | Drugs (283)  |
| 182     | Soaps and cosmetics (284)  |
| 190     | Paints, varnishes, and related products (287)                            |
| 191     | Agricultural chemicals (287)   |
| 192     | Industrial and miscellaneous chemicals (281, 286, 289)                   |
|         | Petroleum and coal products  |
| 200     | Petroleum refining (291)   |
| 201     | Miscellaneous petroleum and coal products (295, 299)                     |
|         | Rubber and miscellaneous plastics products                               |
| 210     | Tires and inner tubes (301)  |
| 211     | Other rubber products, and plastics footwear and belting (302-304, 306)  |
| 212     | Miscellaneous plastics products (307)                                    |
|         | Leather and leather products   |
| 220     | Leather tanning and finishing (311)                                      |
| 221     | Footwear, except rubber and plastic (313, 314)                           |
| 222     | Leather products, except footwear (315-317, 319)                         |

**Durable Goods**

|     |  |
|-----|--|
|     | Lumber and wood products, except furniture                       |
| 230 | Logging (241)  |
| 231 | Sawmills, planing mills, and millwork (242, 243)                 |
| 232 | Wood buildings and mobile homes (245)                            |
| 241 | Miscellaneous wood products (244, 249)                           |
| 242 | Furniture and fixtures (25)                                      |
|     | Stone, clay, glass, and concrete products                        |
| 250 | Glass and glass products (321-323)                               |
| 251 | Cement, concrete, gypsum, and plaster products (324, 327)        |
| 252 | Structural clay products (325)                                   |
| 261 | Pottery and related products (326)                               |
| 262 | Miscellaneous nonmetallic mineral and stone products (328, 329). |
|     | Metal industries   |
| 270 | Blast furnaces, steelworks, rolling and finishing mills (331)    |
| 271 | Iron and steel foundries (332)                                   |
| 272 | Primary aluminum industries (3334, part 334, 3353-3355, 3361)    |

**Census  
Code**

**MANUFACTURING-Continued**

**Durable goods-Continued**

|     |   |
|-----|---|
| 280 | Other primary metal industries (3331-3333, 3339, part 334, 3351, 3356, 3357, 3362, 3369, 339) |
| 281 | Cutlery, handtools, and other hardware (342)  |
| 282 | Fabricated structural metal products (344)  |
| 290 | Screw machine products (345)  |
| 291 | Metal forgings and stampings (346)  |
| 292 | Ordnance (348)  |
| 300 | Miscellaneous fabricated metal products (341, 343, 347, 349)                                  |
| 301 | Not specified metal industries  |
|     | Machinery, except electrical  |
| 310 | Engines and turbines (351)  |
| 311 | Farm machinery and equipment (352)  |
| 312 | Construction and material handling machines (353)   |
| 320 | Metalworking machinery (354)  |
| 321 | Office and accounting machines (357, except 3573)   |
| 322 | Electronic computing equipment (3573)   |
| 331 | Machinery, except electrical, n.e.c. (355, 356, 358, 359)                                     |
| 332 | Not specified machinery   |
|     | Electrical machinery, equipment, and supplies   |
| 340 | Household appliances (363)  |
| 341 | Radio, T.V., and communication equipment (365, 366)   |
| 342 | Electrical machinery, equipment, and supplies, n.e.c. (361, 362, 364, 367, 369)               |

**INTRODUCTION****INTERVIEWER INSTRUCTIONS —** Read introduction once to each respondent. Do not repeat to another respondent who was in the room when you earlier read the introduction.

(As I described during my last visit.) This survey is about the economic situation of people living in the United States. Most of the questions will be about ...'s activities during \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_. Here is a calendar that shows the 4 months we will be talking about. (Hand respondent Flashcard J.) This time period is very important, so if you have any questions about what period is being referred to during the interview, please ask me.

We need the most accurate and complete information possible. Please think carefully about each question, search your memory and take your time in answering. For some of the questions it will help to look up the answers by checking whatever records are available to you here. (GO TO CHECK ITEM N1.)

## Section 3 — AMOUNTS (Continued)

## Part B — SAVINGS ACCOUNTS, MONEY MARKET DEPOSIT ACCOUNTS, CERTIFICATES OF DEPOSIT, AND NOW ACCOUNTS (ISS Codes 100, 101, 102 and 103)

CHECK  
ITEM A9Asset types owned.  
Mark (X) all that apply.

4300

1 ☐ ISS Code 100 — Regular/Passbook Savings Accounts

4302

2 ☐ ISS Code 101 — Money Market Deposit Accounts

4304

3 ☐ ISS Code 102 — Certificates of Deposit or other Savings Certificates

4308

4 ☐ ISS Code 103 — NOW, Super NOW or other interest-earning checking accounts

1. Earlier you said that ... had (Read names of owned assets).

CHECK  
ITEM A10

Interview status of ...'s spouse.

4308

1 ☐ No spouse in household — SKIP to 3b2 ☐ Interview for spouse not yet conducted3 ☐ Interview for spouse already conducted — SKIP to 3a

2a. Did ... own any of these jointly with ...'s (husband/wife)?

4310

1 ☐ Yes2 ☐ No — SKIP to 3b

b. What is your best estimate of the total amount of interest earned on these jointly held (Read asset types) during the 4-month period?

4312

\$  . 00 — SKIP to 3ax1 ☐ DKx2 ☐ Ref. — SKIP to next ISS Code or Check Item P1, page 45

c. What is your best estimate of the average amount that ... and ...'s (husband/wife) had in these jointly held (Read asset types) during the 4-month period? ★

4314

\$  . 00 — SKIP to 3ax1 ☐ DKx2 ☐ Ref. — SKIP to next ISS Code or Check Item P1, page 45

d. (This information is especially important for the purposes of this survey.) If I were to call back later would you be able to provide me with an estimate of the average amount?

4318

1 ☐ Yes — Mark Reminder Card, item 52 ☐ No

3a. Besides any (Read asset types) owned jointly with ...'s (husband/wife), did ... have any other (Read asset types)?

4318

1 ☐ Yes2 ☐ No — SKIP to next ISS Code or Check Item P1, page 45

b. What is your best estimate of the total amount of interest ... earned on these (Read asset types) during the 4-month period?

4320

\$  . 00 — SKIP to next ISS Code or Check Item P1, page 45x1 ☐ DKx2 ☐ Ref. — SKIP to next ISS Code or Check Item P1, page 45

c. What is your best estimate of the average amount that ... had in these (Read asset types) during the 4-month period? ★

**CHECK ITEM M6**

Did ... have any income sources 2 waves ago that ... did not have this wave? (Only column 4 of the Income Roster is marked)

6150

1 ☐ Yes — Enter income codes in item 6b and read item 6b to respondent.  
2 ☐ No — SKIP to Check Item M7

6b. In our visit of 8 months ago, we recorded that ... received certain types of income that we have not recorded for this visit — namely (Read income types).

(Ask for each income type:) During the 4-month period (Read missing wave period) from \_\_\_\_\_ through \_\_\_\_\_, in which months, if any, did ... receive (Read income type)?

**CHECK ITEM M7**

Did ... have any income sources this wave that ... did not have 2 waves ago? (Only column 5 of the Income Roster is marked)

6264

1 ☐ Yes — Enter income codes in item 6c and read item 6c to the respondent.  
2 ☐ No — SKIP to item 6d

6c. We have recorded during this visit that ... received certain types of income that ... was not receiving at the time of our visit 8 months ago — namely (Read income types).

(Ask for each income type:)

During the 4-month period (Read missing wave period) from \_\_\_\_\_ through \_\_\_\_\_, in which months, if any, did ... receive (Read income types)?

| Income type code | Months received  |      |      |      |      |      |
|------------------|--|------|------|------|------|------|
|                  | M1 = earliest month in period/M4 = most recent month in period |      |      |      |      |      |
|                  | All  | M1   | M2   | M3   | M4   | None |

NOTES

## Section 6 — MISSING WAVE (Continued)

**CHECK  
ITEM M8**

Are any assets listed in the  
Asset Roster (Item 7a) or the  
ISS?

- 6476** 1 ☐ Yes  
2 ☐ No — SKIP to 7d

**INTERVIEWER INSTRUCTION**

1. If any asset codes (100—150, 174, 175), not already listed in the Asset Roster (item 7a), appear on the ISS, transcribe them to the Asset Roster.
2. Mark column (5) of the Asset Roster for ALL asset codes that appear on the ISS.
3. Go to Check Item M9.

**7a. ASSET ROSTER**

The missing wave period covers the 4-month period from \_\_\_\_\_ through \_\_\_\_\_.

| 10                 |                               |                      | 1 <input type="checkbox"/> | 2 <input type="checkbox"/> |

**CHECK  
ITEM M9**

Did ... have any asset types 2 waves  
ago that ... did not have this wave?  
(Only column 4 of the Asset Roster is  
marked.)

- 6558** 1 ☐ Yes — Enter asset code(s) in item 7b and read  
item 7b to respondent.  
2 ☐ No — SKIP to Check Item M10

**7b.** In our visit of 8 months ago, we recorded  
that ... had certain assets that we have  
not recorded during this visit — namely  
(Read asset types).

ASK FOR EACH —

Did ... own this asset at any time during the  
period (Read missing wave period) from  
\_\_\_\_\_ through \_\_\_\_\_

| Asset code  | Yes                                    | No                         |
|-------------|--|----------------------------|
| <b>6560</b> | <b>6562</b> 1 <input type="checkbox"/> | 2 <input type="checkbox"/> |
| <b>6564</b> | <b>6566</b> 1 <input type="checkbox"/> | 2 <input type="checkbox"/> |
| <b>6568</b> | <b>6570</b> 1 <input type="checkbox"/> | 2 <input type="checkbox"/> |

**CHECK  
ITEM M10**

Did ... have any asset types this  
wave that ... did not have 2  
waves ago? (Only column 5 of  
the Asset Roster is marked.)

- 6572** 1 ☐ Yes — Enter asset code(s) in item 7c and read  
item 7c to respondent.  
**6574** 2 ☐ No — SKIP to item 7d

**7c.** We have recorded during this visit that ...  
had certain types of assets that ... did not  
have at the time of our visit 8 months ago —  
namely (Read asset types).

ASK FOR EACH —

Did ... own this (these) asset(s) at any time  
during the period (Read missing wave period)  
from \_\_\_\_\_ through \_\_\_\_\_

| Asset code  | Yes                                    | No                         |
|-------------|--|----------------------------|
| <b>6576</b> | <b>6578</b> 1 <input type="checkbox"/> | 2 <input type="checkbox"/> |
| <b>6580</b> | <b>6582</b> 1 <input type="checkbox"/> | 2 <input type="checkbox"/> |
| <b>6584</b> | <b>6586</b> 1 <input type="checkbox"/> | 2 <input type="checkbox"/> |

**d.** During the 4-month period (Read missing wave  
period) from \_\_\_\_\_ through \_\_\_\_\_  
did ... have any assets that  
we haven't talked about?

- 6588** 1 ☐ Yes  
2 ☐ No — SKIP to Check Item M11

## Section 6 — MISSING WAVE (Continued)

7e. What was the asset type called? (Enter asset code(s) at right from Income Source List on page 76a.)

| Asset code |  | Asset code |  |
|------------|--|------------|--|

## APPENDIX C

## COMPARISON OF ITEM LOCATIONS ON WAVE 1 AND LATER WAVES

A number of changes were made to the record layout between Waves 1 and 2 for the 1984 panel, while the layout has remained constant for all subsequent waves. The following table should help you find corresponding locations in the two formats.

| <u>Starting Location</u> |           |      | <u>Starting Location</u> |           |      |
|--------------------------|-----------|------|--------------------------|-----------|------|
| <u>Difference</u>        |           |      | <u>Difference</u>        |           |      |
| Wave 1                   | Waves 2-4 |      | Wave 1                   | Waves 2-4 |      |
| 1                        | 1         | 0    | n/a                      | 1074      |      |
| 18                       | 15        | -3   | 1205                     | 1077      | -128 |
| n/a                      | 62        |      | n/a                      | 2007      |      |
